Get flexible, scalable and reliable VoIP

SIP Trunking with Dynamic IP

WINDSTREAM
ENTERPRISE

Your business is evolving.
How will you evolve your business communications?

For today's organizations, the only constant is change. New locations, new hires and new ways of doing business add up to new demands on your existing voice and data infrastructure. The pressure is on to:

Reduce costs. Maintaining a legacy PBX costs more and delivers less as your business grows. Plus, supporting the same business services across a dispersed organization via separate voice and data platforms is unsustainable.

Keep your workforce connected. Your infrastructure must reach your employees wherever they are, on any device and at any number they prefer to be contacted.

Implement unified communications (UC). Businesses are seeing the benefits of integrating voice, data, mobile communications and feature-rich applications in a unified approach to enhance productivity and enable collaboration. Legacy PBXs can't support those applications on their own.

The time is right for Voice over IP

Moving to an IP-based unified communications (UC) infrastructure is more important than ever. But rip-and-replace may not be an option when you've invested heavily in your voice system. Dynamic IP offers a cost-efficient solution.

VoIP is transforming business communications by combining separate voice and data channels into a single, cost-saving connection to optimize network performance and deliver a consistent user experience with stable voice quality, survivability and feature standardization across multiple locations.

Only Dynamic IP supports multiple call paths—analog, SIP trunking and PRI.

Dynamic IP from Windstream Enterprise

It's cost-efficient
Converge separate voice and data channels into a single connection that reduces bandwidth waste and saves money.

It's scalable
Scale your bandwidth and call paths to meet the demand as your business evolves.

It's survivable
Keep doing business even if an outage occurs.

Grow your business as you control your costs

Get a flexible VoIP solution
Only Dynamic IP supports multiple call paths—analog, SIP trunking and PRI. So you get a solution that works with your infrastructure.

Deliver bandwidth where your people need it most
Dynamic IP automatically adjusts bandwidth allocations based on call volume—as calls come in, data speed is shifted towards voice services. When calls diminish, it's shifted back to data.

Add bandwidth as your organization grows
Whether you're adding employees, locations or both, Dynamic IP scales easily with minimal or no additional infrastructure investment.

Keep your business up and running
With continuous failover capabilities, you can keep doing business if an outage occurs.

Leverage existing PBX or set up integrations, such as Microsoft Teams Phone
Whether you want to retain your legacy PBX hardware or are migrating to a cloud solution, Dynamic IP provides economical connectivity for all your voice needs.

Use advanced features
With a standard feature set that leads the industry, Windstream Enterprise Dynamic IP comes with cloud-based call forwarding, 3-way calling and more.

Focus on what matters most— we'll do the rest
As a managed service, Dynamic IP is set up and run by Windstream Enterprise, and backed by our expertise and 24/7 support.

The Windstream Enterprise Advantage

With support from beginning to end, Windstream Enterprise brings together the tools, teams and technologies to meet your converged communications goals. Based on your requirements and goals, our leading Professional Services team can help support strategic planning, design and deployment. And because it's from Windstream Enterprise, Dynamic IP is backed by 24/7 service and support.

Cloud-enabled connectivity, communications and security—guaranteed.

Windstream Enterprise drives business transformation through the convergence of our proprietary software solutions and cloud-optimized network to unlock our clients' revenue and profitability potential. Our managed services streamline operations, enhance productivity and elevate the experience of our clients and their end users while securing their critical data and brand reputation. Analysts certify Windstream Enterprise as a market leader for our product innovation, and clients rely on our unrivaled service guarantees and best-in-class management portal. Businesses trust Windstream Enterprise as their single source for a high-performance network and award-winning suite of connectivity, collaboration and security solutions—delivered by a team of technology experts whose success is directly tied to our clients' complete satisfaction.
