## Provide a best-in-class customer experience

Customers expect a consistent and high-quality experience no matter how they contact your business. Implementing an omnichannel contact center solution is the first step in delivering that level of proficiency.

### **Deliver top-notch service to every customer**

Centralize call, text, web-chat and email sessions to service more customers more efficiently with Windstream Enterprise's omnichannel, cloud-based contact center solution, OfficeSuite UC Contact Center Services.

OfficeSuite UC Contact Center is designed to improve call, text, web-chat and email management by combining them into the same integrated contact center. You no longer need to have multiple solutions to meet customers via phone or digital channels. By utilizing call queues or virtual waiting rooms for different departments, you can ensure callers speak to the right person every time. And, when callers are waiting on hold, they can be entertained by music or pre-recorded announcements defined by your business.

Most customers prefer web-based chat, text messaging or email as an alternative to calling. With OfficeSuite UC Contact Center Services, all interactions can be handled with omnichannel functionality, delivering greater flexibility.

Through advanced skill-based routing, call, text, chat and email sessions can be routed to top agents and queues can be prioritized over one another for maximum efficiency.

By fully integrating with our award-winning unified communications solution, OfficeSuite UC, your employees get access to the features they need to deliver efficient and professional service, while your customers experience better communication and faster response times.

## Game-changing features and benefits

### See historical and real-time agent activity on one customizable screen

Monitor productivity and contact center volumes by viewing real-time agent and queue statuses.

Instantly see how many calls, texts, chats or emails are in progress and how many of them are waiting.

Analyze critical inbound and outbound interactions to ensure optimal efficiency, including the longest wait times, volume by channel, interactions missed and more.

Transform ongoing texts or chats directly into voice as the conversation evolves with omnichannel routing.

### Record call, text, chat and email sessions for compliance, quality assurance and training

Store voice recordings, chat and text transcripts and emails\* in our secure cloud for 30 days, and easily download, move and share files.

Encrypt all data with AES 256-bit key encryption for added security.

Download and store recordings offline, or utilize our optional Secure File Transfer Protocol service for a more streamlined transfer of call and messaging data.

\*30-day storage of email applies to CCS hosting only, and does not impact the retention policy of the underlying email service provider.

### Ensure staffing and customer needs are met with advanced reporting metrics

View when your customers most frequently contact your business. Data is available in hourly, daily, weekly, and monthly increments.

Track how long your customers are waiting on hold.

View employee activity, including time spent in ready or away states, number of calls and messages answered or missed, average and total time spent interacting with each channel and more.

Schedule, export and save reports for future use and review.

### Simplify employee workflows and improve productivity

Make it easy for your employees to sign in and out of their queue duty.

Leverage an intuitive dashboard to quickly and easily view all contact center activity for improved performance and efficiency.

## Safeguard your mission-critical communications

### Database security

No information or data is stored on vulnerable local servers. Our databases are stored on secure servers in our cloud infrastructure—all protected by industry-standard firewalls, access control lists, authentication and authorization.

### Communication security

Calls, chats, messages and meetings using the Internet are encrypted from the handset into our secure network.

### Information protection

Unlike other providers, we own the code and utilize unique technology instead of SIP or open source to help you meet SOC2 and HIPAA compliance requirements. OfficeSuite UC delivers a proprietary design to encrypt meetings and messages and secure everything in the cloud.
