

SECURE WIFI

Windstream Enterprise Secure WiFi & Analytics

Windstream Enterprise Secure WiFi & Analytics provides valuable presence and usage data for business intelligence, supports industry security and compliance requirements with built-in wireless intrusion prevention and leverages cloud-based management and plug and play access points for easy install and maintenance without IT staff or special training.

Better analytics for a better bottom line

As part of the Windstream Enterprise Professional Services offering, Secure WiFi & Analytics supports both corporate applications that drive employee productivity as well as consumer applications that drive engagement, loyalty and sales.

Analytics for business intelligence

Presence analytics – foot traffic, dwell time

Loyalty analytics – repeat visitors, frequency

Social media – conversion, demographics

WiFi usage analytics – device types, duration

Easy to deploy and manage

Single solution supports both private and public WLANs

Zero-touch installation

Cloud-based management – customizable user interface

Highly flexible and scalable

Highly secure WiFi

Top-rated Wireless Intrusion Prevention System (WIPS)

Exceed PCI, HIPAA, GBLA compliance requirements

End-to-end secure network – wired/wireless

End-to-end secure connectivity with MPLS network

Migration path to an “all-wireless” network edge over time
