

# WHAT'S STANDING BETWEEN YOU

# AND THE NETWORK CONNECTION YOU NEED?

## RESILIENT

Get increased capacity and improved uptime while protecting yourself from critters and costly outages. Plus, it's pretty much impervious to rain.

## AFFORDABLE

With no upfront equipment or engineering costs, it's cheaper to install. And, using both fiber and wireless paths simultaneously avoids wasting idle capacity, so you aren't paying for unused bandwidth.

## SCALABLE

With bandwidth speeds from 10 Mbps to 5 Gbps Ethernet, Fixed Wireless grows with you.

## RAPIDLY DEPLOYED

Installed and operational in as few as 30 days\*, with no need to rip up roads and sidewalks.
