1 Web Conferencing Overview

Web Conferencing consists of 2 separate applications, the Conference Center for setting up and managing Web meetings and Conference Controls for conducting Web meetings and audio conferences.

Conference Center

Logging in as Chairperson brings up the Conference Center application. The Conference Center is where you schedule and organize Web meetings, manage invitations and registrations, track participation and feedback and launch your Web conferences. You can also manage meeting recordings, set up podcasts of your recordings and view reports.

On-Demand Meetings

On-demand meetings are Web conferences that are held without being previously scheduled. You launch on-demand meetings from the Conference Center. Participant registration information and feedback from on-demand meetings is limited to your existing settings which you may choose to modify.

Scheduled Meetings

Scheduled meetings are Web conferences that you set up in advance and invite people to attend. You can require invitees to pre-register or allow them to register when they join the meeting. Invitations can be sent by e-mail and posted to Facebook and Twitter accounts.

Links to the meeting registration page can be embedded in e-mail or Web-based announcements as part of marketing campaigns, and you can track the registrations separately for each campaign. You can customize the registration page to provide detailed information about the meeting and presenters, and collect information from the registrants.

Meeting reminders, post-meeting e-mails and post-meeting surveys provide a variety of opportunities to communicate with people before and after your meetings. You have the option to customize all of these communications.

Broadcast Audio

The audio portion of a Web conference can be broadcast over the Internet instead of, or in addition to, over the phone. This allows your Participants to listen to the meeting when using a phone is not convenient. Broadcast audio is one-way only.
Reports

Web Conferencing automatically generates reports for your Web meetings. The reports include who was invited to your meetings, who registered and how they registered and who actually attended your meetings. The reports also include information collected during registration, information from the meeting itself such as chat transcripts and polling results and post-meeting survey results.

Recordings

Audio conferences (on-demand, scheduled and operator-assisted) and Web conferences can be recorded and played back later. The audio portion of a meeting is automatically synchronized with the Web portion. You can edit recordings, download them, attach them to meeting communications and post them on Facebook, Twitter and other Web sites.

Podcasts

Web Conferencing provides you with everything you need to set up a podcast feed and turn your recordings into podcast episodes. Both audio-only and audio / video recordings are supported. When you add a recording to your podcast feed, it is automatically converted to the appropriate format so that people who subscribe to your podcast can download and play it.

Conference Controls

The Conference Controls application is where you upload presentations and conduct Web meetings. You open the Conference Controls from the Conference Center.

Upload & Present Slides

You can create presentations in PowerPoint and upload them to Web Conferencing where they are available for you to use. Other file formats are supported as well for uploading pictures and other graphical content. You can reorder slides once they are uploaded. Various markup tools let you annotate and highlight slides as you present them.

Designate Co-Presenters

The Chairperson can designate one or more Web conference Participants to be co-presenters. Co-presenters have access to all the conference controls to upload and present slides, create and insert polls and share or grant control of their applications and desktops. Co-presenters do not have access to the audio controls.
Share Applications

Presenters can share applications or their entire desktop during a meeting. Shared applications are visible to all meeting Participants.

Grant Control

Presenters can grant control of individual applications or their entire desktop to meeting Participants. When control is granted, both the presenter who granted control and the Participant to whom control is granted can interact with the applications or desktop at the same time.

Create Polls

Presenters can create polls and insert them among the slides in the presentation. Six (6) different polling question types are supported. When a poll is presented during the meeting, Participants submit responses that are tallied and optionally displayed back to the Participants. Poll results are saved with other meeting reports in the Conference Center where they can be viewed and downloaded.

Chat

The Chairperson, co-presenters and Participants can communicate with one another via text messages during a Web meeting. Presenters can chat with each other, with individual Participants or with all Participants at once. Participants can chat with the presenters but not with each other. Chat messages are saved with the other meeting reports in the Conference Center where they can be viewed and downloaded.

Record Meetings

Any audio conference or Web conference can be recorded and made available for playback later. The Conference Center provides features for managing, editing and making recordings available for playback through downloads or social media channels.

Control Audio

During an audio conference or Web conference, only the Chairperson has a variety of audio controls available, including muting and unmuting lines, disconnecting Participants, dialing out to Participants and locking the conference to prevent additional Participants from joining. The audio controls include a phonebook to facilitate dialing out, which is also used to automatically display the names of audio Participants during a meeting who are listed in the phonebook.
Log In (Chairperson)

Logging in as Chairperson brings up the Conference Center application in your browser window. The Conference Center is where you access all Web Conferencing features, including launching the Conference Controls application.

To log in, go to windstreambusiness.com/webconference and choose Archive to display the login page.

Chairperson Login

![Login page](image)

Enter the conference phone number, your 7-digit access code and your 4- to 9-digit passcode in the corresponding textboxes. Then click the Login button.

Using the Open Meeting Controls button in Conference Center to start a meeting brings up the Conference Controls application. Java is recommended for streamlining the launch process, but you can still log in without it (see below). If Java is not installed, and you attempt to open the Conference Controls, directions are displayed to guide you through the installation process. When the Java installation is complete, the launch process continues as normal and the Conference Controls window appears.

Logging in Without Java

If you cannot install Java on your computer, you can still log in to the Conference Center as you normally would, using your access code and passcode. However, additional steps are required each time you launch the Conference Controls application (using the Open Meeting Controls button in Conference Center).

Note: Mac users must have Java installed to launch the Conference Controls application.
When you launch the Conference Controls application, a Web browser window comes up. Ignore the Java installation instructions, if any, and click on the Having trouble downloading? link. This displays the following message:

Note the security code and click on the Click here link to continue, which displays a File Download – Security Warning dialog.

Click the Run button to download the Conference Controls application. After it downloads, the login window appears.
Enter the security code (within 5 minutes) and click the Login button to complete the Conference Controls launch process.

**Join a Meeting (Participant)**

Joining a Web conference brings up a window with controls for viewing and participating in the meeting.

*Note*: If you join a meeting before the Chairperson arrives, you are asked to stand by for the meeting to begin.

To join the audio portion of a Web meeting, dial the conferencing phone number and enter your access code.

**Joining On-Demand Meetings**

To join an on-demand meeting, go to the windstreambusiness.com/webconference and choose Join a Conference to display the login page.

Enter the conference phone number and your 7-digit access code in the corresponding text boxes. Then click the Join button.

It is recommended that you have the Adobe Flash browser plugin installed on your computer so that the meeting view and Participant controls are displayed in your Web browser's window. If Flash is not installed, directions are displayed to guide you through the installation process. When the Flash installation is complete, the launch process continues as normal and the meeting view and controls appear in your browser window.

When the Flash plugin is installed, return to the login page and enter the 7-digit meeting access code in the Access Code text box. Then click the Join button.
2 Conference Center

By going to the Windstream Web site, clicking on Archive and logging in launches the Conference Center application.

From the Web Conferencing menu on the left in the Conference Center, you can

- Schedule and customize meetings, manage registrations and initiate meetings.
- View reports from meetings.
- Manage recordings of meetings.
- Set up a podcast feed for your recordings.

The Technical Support button next to the Logout button at the top right of the Conference Center window lists technical support numbers. The Help button displays an online help window.
Home

The **Home** link in the **Web Conferencing** menu displays the Conference Center home page for scheduling, managing and initiating meetings.

The home page lists the on-demand meeting option and up to three scheduled meetings by date and time.

- The **Open Meeting Controls** button opens the Chairperson Conference Controls window.
- The **Schedule a Meeting** button displays the initial page for scheduling a new meeting.
- The **Time Zone** drop-down menu sets and displays the default time zone. Unless otherwise noted, all times displayed in Conference Center are in this time zone.

**On-Demand Meetings**

On-demand meetings are held without being previously scheduled. Participants in on-demand meetings are not notified through the Conference Center, so they must be invited through other means, like e-mail for example.

The **Participant Login Info** link in the **On-Demand** section of the home page displays a form with detailed meeting login information that you can copy and paste into an e-mail to invite people to join the on-demand meeting.
The Edit On-Demand Registration link in the On-Demand section of the home page displays a page for customizing registration information for on-demand meetings.

The Name field is always required. Enter a title for each additional field of custom registration data you want to collect (up to 5) and check the box if you want to make it required information.

**Note:** By default, this is also the registration information that people must provide to access recordings.

To conduct an on-demand meeting, choose the On-Demand Meeting option and then click on the Open Meeting Controls button.

**Scheduled Meetings**

Scheduled meetings are meetings that you set up in advance and invite Participants to attend. Scheduling a new meeting is a two-step process:

1. Enter meeting details.
2. Send meeting invitations via e-mail, Facebook or Twitter.

Conference Center offers a number of e-mails and Web pages for communicating with invitees, registrants and Participants before and after a meeting. You can preview and edit any of these options when you schedule a meeting.
When scheduling a meeting that requires pre-registration, you can also set up marketing campaigns with unique registration links for inviting people to the meeting, and track those campaigns.

After scheduling a new meeting, you can go back and edit any of this information prior to the meeting.

**Schedule a Meeting**

To schedule a new meeting, click the **Schedule a Meeting** button. This displays the first of 2 pages for entering information for the meeting.

The **Meeting Details** section is for setting up and entering the details of the meeting.

- **Meeting Title**: Give a descriptive title for the meeting.
- **Host(s)**: List 1 or more hosts for the meeting. The name(s) you provide as hosts are included in e-mails to invitees and registrants.
- **From E-mail**: Enter the e-mail address of the meeting organizer. This is the reply-to address on e-mails Conference Center sends to invitees and registrants. Invitees can reply to this e-mail address if they want more information or have questions about the meeting. This is also the address where Conference Center sends e-mail notifications. The Web Conferencing account holder’s e-mail address is the default.
- **Date**: Enter the date of the meeting in MM/DD/YYYY format or use the calendar icon to select a date.
- **Time**: Enter or select the time of the meeting, as well as the time zone, if different from the default set in the Conference Center home page.
- **Duration**: Enter an expected duration for the meeting. The actual meeting can end earlier or later; the duration is just to help Participants schedule their time.
• **Registration Type:**

  ![Registration Type Options](image)

  **Register at time of meeting:** Choose this option if you do not want to collect and track registrations in advance. Invitees register when they join the meeting.

  **Pre-register before the meeting:** Choose this option if you want to confirm / deny registrants and track registration in advance. Invitees must register prior to the meeting.

  If you choose this option, you can also choose to **Automatically Confirm All Registrants** (default) or **Manually Confirm All Registrants**. Automatic confirmation sends a confirmation e-mail with meeting login information to Participants immediately after they register. Manual confirmation requires you to decide which registrants to confirm and which to decline.

  **Notify me of new registrations via e-mail:** If you choose to have invitees pre-register for the meeting, this option allows you to be notified by e-mail as they register.

  The **Help me choose** link provides additional information if you are not sure when invitees should register.

  **Note:** Be sure to select the meeting registration type you want before you click the **Save and Next** button to proceed to the next page. Once you do, you cannot go back and change the registration type.

• **Meeting Type:**

  ![Meeting Type Options](image)

  **Web and Audio:** Choose this option if the meeting is both Web and audio.

  **Audio Only:** Choose this option if the meeting is audio only.

  **Web Only:** Choose this option if the meeting is Web only.
- **Audio Type:**

**On-Demand:** Choose this option if you do not need a Windstream operator or other assistance for the meeting and the meeting will have no more than 96 attendees (or up to 150, depending on account settings).

- **Dial-in Number(s):** Check the boxes to include your U.S. / Canada toll-free number and/or your U.S. toll number for the meeting. If you plan to invite international Participants, and know which countries they will be calling from, click the Add International Numbers (Optional) link to select the individual international numbers for these countries. If you aren’t sure which countries they will be calling from, check the box to include a link to the list of all international toll-free numbers.

- **Access Code:** Your Web Conferencing access code is automatically included in the information for this meeting.

**Other:** Choose this option if the meeting has over 96 Participants or you need operator services during the meeting. If you select this option, you are instructed to call Windstream to set up your meeting and provide you with dial-in numbers depending on your meeting requirements. The numbers you enter are included in meeting communications.
- **Enable broadcast audio**: Check this box if you want to broadcast the audio portion of your Web conference over the Internet. Call Windstream for a broadcast audio code to enter.

- **Display dial-in number during conference**: Check this box to display a number during the meeting for Participants to use if they prefer to dial in rather than listen to the broadcast audio. The first dial-in number you entered above is automatically copied into this text box.

- The **Help me choose** link provides additional information if you are not sure which audio type to choose.

- **Description**: Enter a description for the meeting (up to 2,000 characters). This description appears in all communications for the meeting.

The **Security** section of the page provides the option to include a security passcode that Participants must enter to join this Web conference.

- **Set security passcode for Web Conferencing**: Check this box if you want to include a security passcode unique to this Web meeting. Enter a security passcode of 4 to 9 alphanumeric characters. This passcode is automatically included in invitation, confirmation, update and reminder e-mails, as appropriate.

Click the **Save and Next** button to display the second page for scheduling a meeting. The Next Steps section of this page is for preparing and sending out invitations and updates for the meeting, and adding the meeting to your calendar.
Note: If you plan to add branding or presenter information, customize your registration form and/or registration confirmation e-mail or set up marketing campaign, be sure to do so in the Advanced Settings section before sending your meeting invitations.

- The **Send Invitations** button sends an invitation e-mail automatically generated from the meeting information you have entered. This button displays a form for entering e-mail addresses manually, or uploading a .csv file with up to 2,000 addresses (or up to 10,000, depending on account settings). If you have previously set up 1 or more marketing campaigns, you can select a campaign to track registration separately for this group of invitees.

- The **Facebook** icon provides options to post a meeting notice to your Facebook page or another Facebook page. The post includes meeting details along with a link to either register for the meeting or to join the meeting, depending on the meeting registration type. You can add a note or edit the meeting details before posting the meeting notice.
- The **Twitter** icon posts a meeting notice to your Twitter page with a link to either register for the meeting or to join the meeting, depending on the meeting registration type. You can edit the meeting notice before tweeting it to your followers.

- The **Preview** link displays the invitation e-mail as invitees will see it.

- The **Edit** link lets you add a custom message to the invitation e-mail.

- The **Send Update** link sends an update e-mail for the meeting to all confirmed registrants or invitees, depending on registration type. You can add files and a custom message to the update.

- The **Upload Confirmed Attendees** link lets specified invitees bypass the registration process for meetings that require pre-registration.

**Step 1 - Download Meeting Template**

Management Training.csv

**Step 2 - Upload Confirmed Attendee List**

Upload the template containing the attendees you wish to bypass the registration process. A confirmation email containing login instructions will be sent to these attendees.

**Use Campaign:** Sales Managers

![Upload button](image)

You may upload 2,000 more participants for this meeting.

![Ok and Cancel buttons](image)

Download and use the .csv meeting template to create a list of the invitees you want to bypass the registration process. Enter the invitees’ names and e-mail addresses (required) and any other information you want to track. You can also select a marketing campaign to track these invitees separately from the other invitees.

When you upload the .csv file, the invitees in it immediately receive the same confirmation e-mail that other invitees receive when their registrations are confirmed.

- The **Add to your Calendar** button adds the meeting to your default calendar client.
- The **Lotus Notes Help** link provides information for adding the meeting to a Lotus Notes calendar.

The **Advanced Settings** section of this page lets you preview and edit various meeting communications sent to invitees, registrants and Participants before and after a meeting. Click the **Show Advanced Setting** link to show these options and the **Hide Advanced Settings** link to hide them.

**Tip:** Always preview these communications to verify the content and appearance of the information in them.

### Registration

Various communications are used during the registration process as invitees register and are confirmed or declined.

<table>
<thead>
<tr>
<th>Registration Form:</th>
<th>Preview</th>
<th>Edit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Registration Confirmation Email:</td>
<td>Preview</td>
<td>Edit</td>
</tr>
<tr>
<td>Registration Declined Email:</td>
<td>Preview</td>
<td>Edit</td>
</tr>
</tbody>
</table>

The **Registration Form** is what invitees see when they register for the meeting. Click the **Edit** link to edit the form.
- **Custom Message**: You can replace the default message with a custom message and change its format.

- **Standard Questions**: Check the Include box next to each standard question you want to display on the registration page. Check the Required box next to each included question to make it a question that registrants must answer in order to register. Name and E-mail are always included and required.

- **Custom Questions**: The custom questions you create are shown here. Each custom question has an Edit and Delete button so you can modify or remove it.

- The Add Custom Question button brings up a form to create a custom question.
**Question Name:** Type in the question you want to appear on the registration page. Check the required box if you want to force Participants to answer this question.

**Type:** Select the type of question you want to add.

**Value:** For Radio Button, Checkbox, Drop-down Menu and List Box types, enter one or more response values. For example, for a Radio Button type question, values might be “Yes”, “No” and “Not Sure”. Use the **Add** button to add additional values.

For meetings requiring pre-registration, the **Registration Confirmation E-mail** is the e-mail registrants receive confirming their registration. Click the **Edit** link to edit the e-mail.

- **Custom Message:** You can replace the default message with a custom message and change its format.
- **Files Available for Download**: You can attach up to 5 files for recipients to download.

For meetings requiring pre-registration, the **Registration Declined E-mail** is the e-mail registrants receive if you manually decline their registration. Click the **Edit** link to edit the e-mail.

- **Custom Message**: You can replace the default message with a custom message and change its format.

- **Files Available for Download**: You can attach up to 5 files for recipients to download.
Branding and Presenters

You can set up a header image (brand) to appear on all meeting e-mails and Web pages. You can also include bios and pictures of the presenters for the meeting.

To edit the branding and presenter information, choose either the Edit Branding or Edit Presenters link.
By default, the header for your meeting is the Windstream Web Conferencing header. If you want, you can replace it with a custom header in the Add Custom Branding section of the page.

- **Header Image**: Click the **Browse** button to upload your header image from your computer. The file must be no larger than 1 MB and must be a .jpg, .gif or .png file. The displayed image is 575 pixels wide by 200 pixels high. If your image’s dimensions are different than this, it is scaled proportionately.

- **Header Alignment**: Select, left, right or center alignment for displaying the header.

- **Header Web Link**: Enter the address of a Web page where you want Participants to be directed when they click on the header.

The Add Presenter Information section of the page allows you to include information for the meeting’s presenter(s).

- **Presenter Name**: Enter the name of the presenter.

- **Presenter Bio**: Enter a short bio for the presenter.

- **Presenter Photo**: Click the **Browse** button to upload a picture of the presenter from your computer. The image must be no larger than 1 MB and must be a .jpg, .gif or .png file. The displayed image is 100 pixels wide by 120 pixels high. If the picture’s dimensions are different than this, it is scaled proportionately.

- **Add Presenter**: Choose this option to add information for 1 or more additional presenters.

**Note**: Presenter information is included on all meeting e-mails and Web pages, so try to keep the presenter bio(s) brief.

**Reminder E-mail**

You can schedule a meeting reminder e-mail to send automatically to all confirmed registrants or invitees, depending on the meeting type.
Click the Add Reminder E-mail link to set up and edit the reminder e-mail.

- **When should this e-mail be sent?**: By default, the reminder date and time is 24 hours before the meeting. If the meeting start time is within 24 hours, the reminder date and time is 2 hours before the meeting. Use the default date and time or specify a different date and time for the reminder e-mail to be sent.

- **Custom Message**: You can replace the default message with a custom message and change its format.

- **Files Available for Download**: You can attach up to 5 files for recipients to download.

  **Note**: Make sure to click the Save button when you are done. Otherwise, the reminder e-mail does not get scheduled.

Once you add a reminder e-mail, use the Preview, Edit and Remove links to view, modify or cancel it.

  **Note**: If you want to send more than one reminder e-mail, you can schedule an additional reminder after the first one has been sent.
Post-Meeting E-mails and Web Pages

You can send out post-meeting e-mails after a meeting has taken place. Different post-meeting e-mail options are available based on the type of meeting. The **Post-Meeting E-mail** is for audio-only meetings. The **Post-Meeting E-mail to Attendees** and the **Post-Meeting E-mail to No-Shows** are for Web and audio and Web-only meetings. The content of all three of these e-mails is similar.

- **Custom Message**: You can replace the default message with a custom message and change its format.
- **Add Recordings**: You can attach archived recordings for recipients to play back.
- **Files Available for Download**: You can attach up to 5 files for recipients to download.

**Note**: Post-meeting e-mails are not automatically sent after a meeting takes place. To send them, view the meeting to see the post-meeting actions. If you want to attach recordings and files to post meeting e-mails, don’t forget to do so before you send them.
The **Post-Meeting Survey Page** is displayed at the conclusion of the Web portion of the meeting.

- Check the **Send attendees to a custom URL** box if you want to bypass this survey page and direct attendees to the URL of your choice.

- **Custom Message**: You can replace the default message with a custom message and change its format.

- **Post-Meeting Survey Form**: Choose whether or not to include the standard question and, if you want, create your own questions by selecting the **Add Custom Question** button. This displays the same form shown and described on page 21.

- **Files Available for Download**: You can attach up to 5 files for attendees to download.

The **Post-Meeting Archive Page** is displayed when someone attempts to register for, or log into a meeting that has already taken place. The content is similar to the **Post-Meeting E-mail**.
Meeting Promotion Tools

For scheduled meetings requiring pre-registration, you can promote your meeting and track registrations from various marketing campaigns.

- **Marketing Campaigns**: You can generate unique URLs to the meeting's registration page to use in online marketing campaigns and track the registrations driven from those campaigns. You can see the effectiveness of each campaign when you view the campaign report for your meeting. Click the **Manage** link to set up 1 or more marketing campaigns.

  ![Create Campaigns](image)

  **Campaign Name**: Enter a campaign name. Names must contain only letters, numbers, spaces and periods. Special characters are not allowed. Click the **Generate URL** button to generate a unique URL for this campaign. Repeat for each campaign you want to create and track. A default campaign named “Default” is automatically created for the meeting.

  **Campaign URLs**: The campaign names and associated URLs are displayed in this window. Copy the URLs to use in your campaign banner ads, Web pages, e-mails, blogs, etc.
Manage Scheduled Meetings

Once a meeting has been scheduled, you can view, edit and clone the meeting information. Click the Home link in the Web Conferencing menu to go to the Conference Center home page, and click on the View, Edit or Clone link of the meeting you want to manage.

The Clone link copies the meeting information to use as the basis for scheduling a new meeting.

The Edit link displays the information you entered when you scheduled the meeting and allows you to edit it.

The View link displays information for the meeting and options for managing it.

- The Open Meeting Controls button opens the Chairperson Conference Controls window.
- The Edit Meeting button displays the information you entered when you scheduled the meeting and allows you to edit it.
- The **Cancel Meeting** button cancels the meeting and lets you send cancellation e-mails to all confirmed registrants or invitees, depending on meeting registration type.

- The **Send Invitations** and **Add to you Calendar** buttons, the **Facebook** and **Twitter** icons, and the **Preview, Edit, Send Update, Upload Confirmed Attendees** and **Lotus Notes Help** links work as described beginning on page 18.

The **Meeting Details** section displays the basic details of the meeting. The **Registration Link** shown in this section is the default URL of the registration page for this meeting. You can copy this URL into any e-mail, Web page, blog, etc. for people to go straight to the registration Web page for this meeting.

For meetings requiring pre-registration the **Manage Attendees** section includes links for managing registrations prior to the meeting.

- The **Confirmed** link displays the list of confirmed registrants with options to decline previously confirmed registrants or resend confirmation e-mails.

- The **Declined** link displays the list of declined registrants with an option to confirm them.

- The **Pending** link displays the list of pending registrants awaiting manual confirmation with options to either confirm or decline them.

The **Reports** section includes links to reports of invitees, marketing campaigns and registration details for you to view and download.

- For meetings requiring pre-registration the **Invitees** link displays the list of invitee e-mail addresses and when they were invited.

- For meetings requiring pre-registration the **Campaign Report** link displays statistics for the marketing campaigns you set up to track registration.

- The **Registration Details** link displays the information the invitees gave when they registered and their registration confirmation status.

- The **View Campaign URLs** link displays a list of all campaign names and their associated URLs. You can copy these URLs into banner ads, blog posts, e-mails and Web pages to track how many registrants you get from each location.
View Past Meetings

The View Past Meetings link on the Conference Center home page shows a list of all past and cancelled meetings.

The Reschedule and Clone links allow you to reuse past meeting information (see below). The Details link for a meeting displays information about that meeting, provides options for post-meeting actions and contains links to various reports for the meeting. This is the same information that is displayed when you use the View Reports link in the Web Conferencing menu and click on the name of a past meeting.

Clone & Reschedule Meetings

Any scheduled, past or cancelled meeting can be “cloned” and used as the basis for creating a new meeting. When you clone a meeting, the information for that meeting is copied for you to edit to create the new meeting.

To clone a meeting, click on the Clone link for the meeting in either the list of scheduled meetings or in the list of past meetings. This displays the same initial page as for scheduling a new meeting. Edit the meeting information as necessary, making sure to change the meeting time and date and send out invitations. Once you finish, the cloned meeting is added to the list of scheduled meetings.

Note: If the original meeting had operator-assisted audio and you want the cloned meeting to have operator-assisted audio as well, contact Windstream at 800.730.2183 to schedule operator services and obtain new dial-in numbers before you send out invitations.

Past meetings can be “rescheduled,” allowing you to repeat the meeting at a later date. When you reschedule a meeting, the meeting is moved back to the list of scheduled meetings with a new time.
To reschedule a meeting, click on the Reschedule link for the meeting in the list of past meetings or the Reschedule link in the top right corner of the window when you view meeting details. In either case, this displays a form for you to enter a new date and time.

If the original meeting had operator-assisted audio, a message notifies you to modify the operator-assisted information. When you click the Reschedule button on this form, you have the option of notifying all confirmed registrants or invitees from the previous meeting, depending on the meeting registration type, that the meeting has been rescheduled.

**View Reports**

Conference Center creates a variety of reports to help you analyze and manage your Web meetings and audio conferences. The View Reports link in the Web Conferencing menu displays a submenu of links to these reports.

**Meetings**

The Meetings link lists all past meetings including on-demand meetings. (The View Reports link also displays this list by default.) Above the list of past meetings is a View Upcoming Meetings link that lists all scheduled meetings.

Click on a meeting to view the reports for that meeting. This displays a page with meeting details, post-meeting actions and links to various reports for the meeting. This is the same information that is displayed when you use the View Past Meetings link on the Conference Center home page and click the Details link for the meeting.
The *Meeting Details* section displays the basic details of the meeting. The **Registration Link** shown in this section is the URL of the archive page for the meeting. You can copy this URL into any e-mail, Web page, blog, etc. for people to see the archive Web page for this meeting. If you set up one or more campaigns for the meeting, the **View Campaign URLs** link displays a list of the campaign names and their associated URLs.

The *Post-Meeting Actions* section provides links to preview, edit and send post-meeting e-mails and to preview and edit the post-meeting archive Web page for the meeting. These are the same post-meeting actions shown in the *Advanced Settings* when you schedule or edit an upcoming meeting.

The *Reports* section includes links to various reports for the meeting for you to view and download. The **Registration Reports** include the following, depending on the registration type for the meeting:

- The **Invitee List** link displays the list of invitee e-mail addresses and when they were invited.
• The Registration Details link displays registration information for the registrants, along with their attendance status.

• The Campaigns link displays statistics for the marketing campaigns you set up to track registration.

The Meeting Reports include the following, depending on the type of meeting and how it was conducted:

• The Web Participants link displays a list of Participants for the Web meeting. The list includes the times each Participant joined and left the meeting and the total number of minutes they attended the meeting. Each Participant's name is a link to registration and post-meeting survey information provided by that Participant.

• The Chat link displays a transcript of the chat messages during the meeting, the time each message was sent and its sender and recipient.

• The Poll Results link displays the polls conducted during the meeting with a summary of responses to each poll as well as the response of each Participant who took the poll.

• The Post-Meeting Survey link displays the information provided by the meeting Participants who responded to the post-meeting survey.

Recordings

The Recordings link lists your archived recordings. Each recording in the list shows the start and end time of the recording and the number of playbacks. You can also view and save the playback report for each recording.

Opt-Out

The Opt-Out link lists the e-mail address for invitees who have chosen to opt-out from receiving meeting invitations. They can opt out when they are invited to register for, or join a scheduled meeting. If you attempt to send subsequent meeting invitations to e-mail addresses that are in the opt-out list, you receive a message that those e-mails are in the opt-out list.

When you view the opt-out list, you can select e-mail addresses from the list and send an opt-in request.

Note: The opt-out list only applies to a single Web Conferencing subscription. If you have multiple subscriptions, recipients must opt-out from each subscription that they do not want to receive meeting invitations from.
Manage Recordings

The Manage Recordings link in the Web Conferencing menu lists all of your archived recordings.

When you archive your recordings with Windstream, you get unlimited playbacks and access to additional features for managing and sharing your recordings. Or, you can download your recordings in up to 4 industry-standard formats and host them on your own server (see below).

Note: If you prefer to host a recording on your own server, be sure to download the recording file and delete it from Conference Center on the day of your meeting to avoid incurring Windstream archiving fees.

To delete 1 or more recordings, check the box next to the recording names and click the Delete Selected button.

To work with an individual recording, click on its name or the arrow next to the name to expand the recording in the list.
The playback window lets you play back the recording within the Manage Recordings page. The View Larger link displays the recording in a larger pop-up window.

Under the Manage section,

- The Rename link displays a form for renaming the recording.
- The Edit link brings up a new browser window with options for editing the recording.
- The Download link allows you to download the recording from the Windstream server and store it locally on your computer. The link displays a form to choose a download format for the recording.

Audio and Visual (flash): Downloads a compressed .zip file containing the recording and Adobe Flash playback resources. Extracting the file creates an archive folder with the following items:
Double-click the *index* file to play the recording. Refer to the *README* file for instructions on embedding the recording in your Web site.

**Audio Only (mp3):** Downloads an .mp3 file for audio playback only.

**Audio & Visual (mp4):** Downloads an .mp4 file for combined audio and video playback. The .mp4 file is provided at the highest resolution compatible with iPod, 640x480.

**Audio Only (.wav ulaw g711):** Downloads a .wav file for audio playback only.

Choose a format and click the **Download** button to save it to your computer.

- The **Delete** link deletes the recording.
- The **View Report** link displays the playback report for the recording and a **Download** button for downloading this information.
- Check the **Enable Registration** box to require people to enter registration information before playing the recording. The **Edit** link lets you change the registration information for this recording only. By default, the playback registration form contains the information you set up for on-demand meeting registration.
- Check the **Notify Me of Playbacks** box to send an e-mail to the Web Conferencing account holder when a recording is played.
- Check the **Require Passcode** box to require people to enter a passcode to access the recording. The **Edit** link lets you change the passcode.
Note: Passcodes are not allowed for recordings you make available as podcasts or through Facebook.

Under the Share options:

- The Show Playback URL link displays the link to play back the recording. You can copy this link and paste it in blogs, documents and other communications. If you enable playback registration, people must complete the registration form before playing the recording.

- The E-mail Playback URL uses your default mail client and composes an e-mail for you to send with the link to play back the recording.

- The Post to Twitter link automatically creates a tweet with the recording title and the recording playback link, and allows you to quickly post it to your Twitter page.

- Check the Add to Feed box to add the recording as an episode to your podcast feed. The Edit link lets you change options for this episode only; it does not change your podcast feed settings.

- The Facebook Options link provides options to embed a recording for playback on your Facebook page or another Facebook page. You can also add a note or edit the recording title or description before posting it. You must first add the recording to your podcast feed to enable this option.

- The Embed in Web page link displays the HTML code for embedding a recording for playback on a Web page or blog. Choose the playback size you want and then copy the code to paste into your Web page. You must first add the recording to your podcast feed to enable this option.

Note: Registration information is not collected for embedded recordings and podcast episodes.

Edit Recordings

The Edit link in the expanded view of a recording displays the Recording Editor window.
Editing a recording involves creating cut points to indicate which sections of the recording to remove. To create one or more cut points:

1. Play the recording until it reaches the start of a section you want to remove.

2. Enter the time indicated by the counter in the control bar below the recording into the Start fields of the Create Cut Point panel to the right.

3. Repeat these steps for the End fields.

4. Click the Add Cut Point button to add the point to the list of cut points.

5. Repeat these steps to create additional cut points for the recording.

When you have created all the cut points you want, click the Make Cuts button to remove them from the recording. This may take a few minutes.

The edits you make to a recording are not permanent. You can restore individual cuts or revert to the original with the View Past Cuts link. This displays a window that lists all the cuts you have made to the recording.
Select a cut to see its start and end times. Click on the **Undo** button to restore an individual cut. Click on the **Revert to Original** button to restore all cuts and go back to the original recording. Restoring cuts may take a few minutes.

When you are done editing your recording, click the **Exit** button to close the **Recording Editor** window.

**Podcast Feed Settings**

You can automatically distribute your recordings archived with Windstream as podcasts through the podcast feed provided with your Web Conferencing subscription. The **Podcast Feed Settings** link in the **Web Conferencing** menu allows you to publish the podcast feed and customize the feed settings.
To customize the podcast feed settings, begin by checking the **Publish Podcast** box at the top of the page to publish your feed. Then, customize the settings:

- **Title**: Give a title for your podcast feed.
- **Subtitle**: Include a subtitle, if you want.
- **Description**: Enter a description that explains what your podcast feed is about.
- **Author**: Give the name of the podcast feed’s author. This may be different than the podcast feed’s owner.
- **Owner Name**: Give the name of the podcast feed’s owner. By default, this is the Web Conferencing account holder.
- **Owner E-mail**: Enter the podcast feed owner’s e-mail address.
- **Copyright**: Enter the copyright date of the podcast feed.

- **Your Web site**: Include the URL of your Web site.

- **Categories**: Select one or more category and subcategory to help subscribers find your podcast feed. Click the **Add Field** button to include additional categories. Click the **Remove** button to remove a category.

- **Keywords**: Enter keywords that describe your podcast feed to make it easier to find. Click the **Add** button to add keywords as you enter them. Select keywords you have entered and click the **Remove** button to remove them.

When you have entered the information, click the **Save** button at the bottom of the page to store the new feed settings.

The **My Podcast Page** link at the top of the settings is a link to the subscription Web page for your podcast feed. Provide this link to potential subscribers to walk them through the subscription process.
- **Audio and Visual Podcast Feed**: Your subscribers can use this option to play your podcast episodes on iTunes, video-capable iPods and other portable music players that support video.

- **Audio-Only Podcast Feed**: Your subscribers can use this option to play your podcast episodes on iPods and other music players that do not support video.

- **Online Audio and Video Playback**: Your subscribers can use this option to play your podcast episodes in a Web-based feed reader.

To add a recording to your podcast feed, choose the **Manage Recordings** link in the **Web Conferencing** menu, select the recording and check the **Add To Feed** box.
3 Conference Controls

Opening meeting controls from the Conference Center displays the Conference Controls window for conducting and managing a meeting.

At the top of the window are options for managing your meeting. At the bottom of the window are options for organizing and presenting slides and polls. The current slide or poll is displayed in the center of the window. Below that are thumbnails. The left hand side of the window contains the list of meeting Participants, the audio controls and a panel for entering and displaying chat messages.
Participants Panel

The Participants panel lists all Participants who have joined the meeting, including the Chairperson. Web meeting Participants are listed under the “Web” heading and audio conference Participants are listed under the “Audio” heading. (See page 48 for information on audio conference controls and Participants.) Participants are listed as they join the meeting. If they join before the meeting has started, they are listed as being in the lobby.

Tip: If there are more Participants than can be displayed in the Participants panel, drag the panel outside of the Conference Controls window and then grow the panel by dragging the lower right corner.

For on-demand meetings, passing the cursor over a Participant displays the registration information for that Participant.

Note: This capability is not available for scheduled meetings.
Clicking the right mouse button on a Web Participant brings up a menu of options for that Participant.

- **Lower Hand** lowers the Participant’s hand if it is raised.
- **Chat** opens a separate window for the Chairperson and co-presenters to chat with the Participant.
- **Disconnect** removes the Participant from the meeting.
- **Promote to Co-Presenter** makes the Participant a co-presenter. A meeting can have multiple co-presenters. Co-presenters have access to all the same meeting controls as the Chairperson and can do everything the Chairperson can do except appoint other co-presenters, disconnect the Chairperson or other co-presenters or manage the audio conference controls.

**Note:** All co-presenters and the Chairperson can change slides and polls, share applications and grant control at the same time, so it is important to coordinate with one another to avoid performing conflicting actions during the meeting.

The Chairperson can demote co-presenters by disconnecting them from the meeting. They can then rejoin the meeting as regular Participants.

- **Lower All Hands** lowers all Participants’ hands that are currently raised.
- **Grant Control of My Applications** grants control of selected applications to another Participant or co-presenter. Until control is revoked, the grantor and grantees share control of the applications.
- **Grant Control of Desktop** grants control of the desktop to another Participant or co-presenter. Until control is revoked, the grantor and grantees share control of the desktop.

### Audio Controls Panel

The **Audio Controls** panel provides controls for managing an audio conference. Only the Chairperson has access to the audio controls.

To start an audio conference, dial in to the Ready-Access audio conferencing service and enter the subscription access code and passcode. After the audio conference has begun, the **Audio Controls** panel displays the audio controls:

- **Mute All** mutes all Participants. You can mute individual Participants in the Participants panel, as described below.

- **Unmute All** unmutes all Participants. You can unmute individual Participants from the Participants panel, as described below.

- **Operator** displays a dialog to speak with an operator in private, or invite the operator to join the conference:

When you request an operator, the **Operator** button changes to a **Cancel** button so the request can be cancelled if necessary.
The Phone Number text box allows you to enter a phone number to dial out and add a Participant to the conference. Special characters and spaces in the number are ignored, but the area code is required. A "011" prefix is required for phone numbers outside the U.S. and Canada.

The Phonebook icon displays the Phonebook window to manage phonebook entries:

Add displays the New Entry dialog to enter information for a new phonebook entry:

Edit displays the Edit Entry dialog to make changes to the selected entry in the All Numbers list. The Edit Entry dialog is the same as the New Entry dialog above.

Delete removes 1 or more selected entries in the All Numbers list from the phonebook.

The right arrow button moves one or more selected entries from the All Numbers list to the Numbers To Dial list. The left arrow removes selected entries from the Numbers To Dial list.
Dial dials out to a number selected in the *Numbers To Dial* list.

**Dial All** dials out to all entries in the *Numbers To Dial* list.

**Exit** closes the *Phonebook* window.

- **Dial Out** dials out to the number entered in the text box. Your conversation is private until you admit the person to the conference.

- **Listen Only** makes the conference a listen-only conference. You can unmute individual Participants but Participants cannot unmute themselves.

- **Continuation** continues the audio conference after the Chairperson has disconnected from the call.

- **Lock Audio** locks the audio conference and prevents new Participants from joining. However, you can still dial out and add Participants to the conference.

Audio conference Participants are listed in the *Participants* panel under the “Audio” heading. Participants are listed by name if the phone number matches a name in your phonebook. Otherwise, they are listed by number. Right-click on an audio Participant in the *Participants* panel to show a menu of options for that Participant.

- **Mute / Unmute** mutes or unmutes the Participant’s phone line. Participants can mute and unmute themselves as well, using their phone keypad.

- **Disconnect** disconnects the Participant from the audio conference.

- **Play Name** plays back the Participant’s name. Names are only available for playback if the *Name Record* option is set.

- **Add to Phonebook** displays the *New Entry* dialog to enter the Participant in the phonebook.

- **Rename** allows you to replace the listed number or name for the Participant with a new name.
An audio conference ends when the Chairperson disconnects, or in continuation mode, when the last Participant disconnects.

**Phone Keypad**

In addition to the audio controls available in the *Audio Controls* panel and the *Participants* panel, your phone’s keypad can also be used to control the audio features.

</table>
Chat Panel

The *Chat* panel allows presenters and Participants to communicate with one another during a meeting using text messages. For example, Participants can use chat to ask questions of the presenters and presenters can use it to coordinate with one another during the meeting. However, Participants cannot chat with one another. The *Chat* panel is active only while a meeting is in progress.

The *Disable Chat* link at the top of the *Chat* panel disables chat during a meeting. While chat is disabled, Participants’ chat panels disappear. When chat is disabled, the *Enable Chat* link enables chat and redisplays Participants’ chat panels.

The main part of the *Chat* panel shows a record of all chat messages. To send a chat, first select a recipient from the drop-down list at the bottom of the panel. Messages can be sent to all Participants, to all co-presenters or to individual Participants or co-presenters. Selecting a recipient displays a single-line text entry box to type the message. To send the message, click the *Send* button.

**Tip:** If you want a larger Chat panel, drag the panel outside of the Conference Controls window and then drag the lower right corner to grow the panel.

Once you send a message to a Participant or a Participant sends a message to you, you can click on the Participant’s name in the *Chat* panel to send another message instead of selecting the name from the drop-down list. Right-click on the Participant’s name for a menu of options to send a reply, open a separate *Chat* window for that Participant and copy a chat message.
Meeting Management Controls

The icons located above the presentation window provide options for managing your Web meeting.

Start / Stop Meeting

The **Start Meeting** icon starts a Web meeting. For on-demand Web meetings, the **Conference Security Passcode** dialog appears, if enabled by the Options settings. This lets the Chairperson set an optional security code that Participants are required to enter to join the meeting.

If an optional security passcode is used, it is only in effect for that meeting.

**Note:** If you check the “Don’t ask me again” box, the Conference Security Passcode dialog does not appear again until you enable it in your Options settings.

During a Web meeting, click the **Stop Meeting** icon to end the meeting.
Record Meeting / End Recording

The **Record Meeting** icon records a meeting. The recording includes everything Participants see and hear during the meeting including slides, polls and shared applications. The Web portion is synchronized with the audio portion of the meeting in the recording. The **Recording Name** dialog lets you name the recording.

![Recording Name Dialog]

You can access, manage and edit recordings from the **Manage Recordings** link in the Conference Center.

**Note:** An audio conference must be in progress to start a recording. Web-only meetings cannot be recorded.

Click the **End Recording** icon at any time during a meeting to end the recording.

Share Desktop

The **Share Desktop** icon shares your desktop with meeting Participants so that you can demonstrate actions or show content in other windows. The **Conference Controls** window goes away and is replaced with the **Sharing Control Bar**.

**Note:** While you are sharing your desktop, all Participants see everything on your screen, so make sure to close or hide any windows you don’t want them to see.

To stop sharing your desktop and return to the **Conference Controls** window, click the green icon on the left of the **Sharing Control Bar**.
Share Applications

The **Share Applications** icon shares specific applications on your desktop with meeting Participants.

**Note:** Mac users cannot share individual applications, only their entire desktop.

The **Share Applications** dialog that appears lists the applications currently running on your computer. You can select 1 or more of these applications to share. Participants see only the applications you select.

**Note:** All open windows of each application you share or grant control of are shown. For example, if you share Internet Explorer and have more than 1 Internet Explorer window open, all of them are shown.

If enabled by your Options settings, applications being shared display a **Sharing** button in their title bars. Applications not being shared include a **Not Sharing** button in their title bars. Applications that you grant control of to a Participant include a **Controlled** button in their title bars. Each of these buttons brings up a menu of control options.
Note: Unshared applications hide the portions of shared applications that they cover. Participants see gray areas in the shared applications where this occurs. Use the Sharing and Not Sharing buttons in the title bars of applications as cues to make sure shared applications are fully visible. This is also the case if you grant control of applications.

- **Stop Sharing This Application** ends sharing for the application and **Share This Application** begins it.
- **Grant Control of This Application** grants control of the application and **End Control of This Application** ends it.
- **Present Slides** ends all sharing and controlling of applications and returns to the Conference Controls window.
- **Share Desktop** shares the desktop. Individual applications continue to be shared.
- **Share Applications** lets you share other applications in addition to the ones currently shared.
- **Stop Sharing** ends all sharing and controlling of applications and returns to the Conference Controls window.
- **Grant control** displays the Grant Control dialog to grant control of the desktop or applications.
- **End Control** ends control of all applications. However, the applications remain shared until you stop sharing.
Grant Control

The **Grant Control** icon grants control of individual applications or your entire desktop to a meeting Participant.

**Note:** Mac users can only grant control of their desktop, not individual applications.

The **Grant Control** dialog that appears provides a choice between granting control of your entire desktop or selected applications. Applications currently running on your computer are listed in the left pane and Participants are listed in the right pane.

To grant control of your entire computer, choose **Grant Control of Desktop** and then select a Participant from the list of Participants. The Participant shares control of your desktop with you until either one of you ends control.

**Note:** When you grant control of your desktop, the Participant has control of your entire computer, not just applications that are currently running. That means the Participant can start or stop applications and even shut down your computer.

To grant control of individual applications, choose **Grant Control of Selected Applications**, select one or more applications from the list of applications and then select a Participant from the list of Participants. The Participant shares control of the selected applications with you until either one of you ends control.

**Note:** When you grant control of an application to Participants who are using Flash to view the meeting, the application’s right mouse button functionality is disabled for the Participant. To access an application’s right mouse button functionality, the Participant must hold the <Alt> key (<Option> key for Mac users) while clicking the left mouse button. The <Ctrl> C, <Ctrl> X and <Ctrl> shortkeys are also disabled. The Participant must use the application’s Copy, Cut and Paste menus for these functions. To avoid these limitations, you can first promote the Participant to co-presenter before granting control.

Invite Others

The **Invite Others** icon invites Participants while a meeting is in session. This launches your default mail client with a default message that includes a link to the Participant Registration Web page for the meeting. The **Invite Others** icon is only available for on-demand meetings.
**Tip:** If you have set an optional security passcode for the meeting, include it in the e-mail if the Participants you are inviting are not already aware of it.

**Options**

The **Options** icon changes Web and audio conference settings. The **Conference Options** dialog that is displayed contains 3 tabs. The **Web** tab includes options for Web meetings.

- **Prompt for Security Passcode for Web Conference**: If checked, the **Conference Security Passcode** dialog appears when you start an on-demand Web meeting, allowing you to set an optional security code that Participants are required to enter to join the meeting.

- **Show warning before sharing Desktop**: If checked, the **Share Warning** dialog appears when you share or grant control of your desktop.

- **Sharing Performance**: Use the slider to control sharing performance. The higher the quality, the lower the speed and vice-versa.

The **Audio** tab includes options for audio conferences.
The *Entry Announcement* settings control the announcement you hear when Participants join and leave the conference:

**Tone (future conferences):** Plays a tone when Participants join and leave the conference (default).

**Silent:** Participants join and leave the conference silently.

**Name:** Participants are prompted to say their names when they dial into an audio conference and the names are announced as they join and leave the conference. This option is only available if you check the **Name record** option below.

**Name record (current and future conferences):** Participants are prompted to say their names when they dial into an audio conference, regardless of the entry announcement mode setting. The Chairperson can play back recorded names during an audio conference from the *Participants* panel.

**Save settings for future conferences:** Saves the current *Entry Announcement* settings for future conferences.

- **Quick Start (future conferences only):** Allows the audio conference to begin before the Chairperson arrives. The setting takes affect for future audio conferences only.

- **Auto Conference Continuation:** Sets the default to allow audio conferences to continue even after the Chairperson disconnects. The Chairperson can turn continuation off during a conference from the *Audio Controls* panel or from the phone keypad.

The *Advanced* tab includes options for application sharing during Web meetings.
- **Enable Title Bar Button**: Choose this option to display the **Sharing**, **Not Sharing** and **Controlled** buttons in application title bars when you share applications or grant control (default).

- **Enable Application Sharing**: Choose this option to enable sharing and granting control of individual applications (default). If you change this setting, you must close and reopen the Conference Controls window for the change to take effect.

If you disable application sharing, the **Share Applications** icon is no longer active. However, you can still share and grant control of your desktop.

**Note**: The **Advanced** tab is not available to Mac users because application sharing is not supported for the Mac.

**Help**

The **Help** icon displays the online version of this User Guide.

**Presentation Controls**

The icons at the bottom of the Conference Controls window provide options for organizing and delivering your presentation.
**Insert Slides**

The **Insert Slides** icon uploads and adds slides to your presentation. This displays a dialog for you to navigate to the file with the slide(s) you want to insert. By default, slides are inserted after the currently selected slide or poll.

Supported formats are: PowerPoint (.ppt), PowerPoint 2007 (.pptx), .jpg, .png, .gif, .jpeg and .bmp. PowerPoint presentations are converted to multiple slides and inserted. All other formats are inserted as single slides.

**Note:** You can have up to 200 slides or polls at any time per subscription, which remain until you delete them. If you attempt to insert more than this, the slides or polls exceeding the 200 limit are not inserted and a message is displayed to ask you to delete existing slides or polls to make room for the new ones.

**Insert Poll**

The **Insert Poll** icon includes a poll in your presentation after the currently selected slide or poll. This displays the **Poll Management** dialog.
You can insert a saved poll that was previously created or create a new poll to insert. To insert a saved poll, select the desired poll question from the list of Saved Polls and make sure the poll shown in the Poll Preview is the one you want. Then click the Insert button. The poll is inserted after the selected, or current, slide or poll. Polls can be inserted before or during a meeting.

A poll consists of a question, a question type and 1 or more responses. You can choose from six question types:

- **Yes / No**: The question requires a simple yes or no answer.
- **Multiple Choice / Single Answer**: The question requires Participants to choose a single answer from one or more choices.

```
What is your job title?
- CEO
- CTO
- CFO
- President
- Vice President
- Director
- Manager
```

- **Multiple Choice / Multiple Answer**: The question requires Participants to choose one or more answers from a variety of choices.

```
How did you hear about us?
- [ ] Web advertisement
- [ ] Colleague
- [ ] TV ad
- [ ] Brochure
- [ ] Trade show
- [ ] Sales call
- [ ] Other
```

---

*smart solutions. personalized service.*
- **Text / Comments Box**: The question requires a written response.

![Text / Comments Box]

- **Ranking Poll**: The question requires Participants to rank a list of choices from 1 to \( n \) where \( n \) is the number of choices. Each choice must be given a unique rank.

![Ranking Poll]
- **Opinion Poll**: The question requires Participants to rate the relative importance of something from “Strongly Agree” to “Strongly Disagree” or “Not Applicable.”

![Opinion Poll Image]

The **New Poll** button in the *Poll Management* dialog displays the *Create Poll* dialog.

Follow these steps to create a new poll:

1. Compose the poll question in the **Question** Text box.

   *Note: Poll questions are limited to 150 characters.*

2. Select a question type from the **Question Type** drop-down list.

3. For all question types except Yes / No, Text / Comments and Opinion Poll, enter 1 or more answers in the **Answers** text box. After entering each answer, click the **Add** button to add it to the list of answers displayed. To delete an answer, select it from the list and click the **Remove** button. Use the up and down arrow icons to reorder the list of answers.

   *Note: Poll answers are limited to 35 characters.*

4. Check the **Display Results to Participants** box if you want Participants to see the results for this poll by default. You have the option to change this when you display the poll during a meeting.
5. Click the **Save** button to save the poll. The poll is added to the list of saved polls for you to insert in a meeting presentation.

To edit a saved poll, select it from the list of saved polls in the *Poll Management* dialog and click the **Edit** button. This displays the *Edit Poll* dialog, which is the same as the *Create Poll* dialog described above.

To delete a saved poll, select it from the list of saved polls and click the **Delete** button.

**Note:** *Saved polls cannot be edited or deleted while a meeting is in progress. If you need to make changes to a poll during a meeting, create and insert a new poll like it.*

During a meeting, Participants see only the poll and then optionally, the poll results. The Chairperson and co-presenters also see a summary of responses. The results and response summary update continuously until the poll is closed.

You can control whether or not Participants see the poll results by checking or un-checking the *Display Results to Participants* box above the response summary. Click the **Close Poll** button to close the poll, or proceed to the next slide or poll. Once a poll is closed, Participants can no longer submit responses. However, you can go back to a closed poll to show Participants the results of that poll.
Delete

The **Delete** icon deletes the currently selected slide(s) or poll(s). Deleted slides are removed permanently from your subscription. Deleting a poll removes it from the presentation, but the poll remains in your subscription until you delete it from the list of saved polls.

Previous

The **Previous** icon displays the previous slide or poll in your presentation.

Next

The **Next** icon displays the next slide or poll in your presentation.

Full Screen

The **Full Screen** icon changes to full screen presentation mode. This affects only the Chairperson’s view of the presentation. Participants must click the **Full Screen** icon in their own Participant windows to view the presentation in full screen mode.

In full screen mode, the Chairperson has access only to the meeting controls used during presentations, located at the bottom of the window, **Previous** and **Next** icons, an icon to show or hide thumbnails and the markup tools.

To return to the **Conference Controls** window, click the **Exit Full Screen** button at the lower right or press the <Esc> key.
**Markup Tools**

The markup tools provide options to highlight and annotate slides as you present them.

![Markup Tools](image)

**Note:** Annotations and highlighting are not saved with the slide and disappear when you display another slide. Also, markup tools cannot be used on polls or when application or desktop sharing.

**Pointers**

The **pointer** icon activates the current pointer for the slide. Choose from 4 different pointer styles. When you click with the pointer on a slide, an image of the pointer is left at that location.

**Highlighters**

The **highlighter** icon activates the current highlighter. Choose from 3 different colors. Click and hold the highlighter to highlight portions of the slide. The highlighter works like an actual highlighting pen, allowing text and graphics in the slide to show through.

**Pens**

The **pen** icon activates the current pen. Choose from 4 different colors. Click and hold the pen as you draw on the slide.

**Erasers**

The **eraser** icon erases individual markings on the slide. Position the dot next to the eraser on the marking you want to erase and click the left mouse key. The entire marking is erased.

The **erase all** icon erases all annotations and highlights on the slide.
Thumbnails

To help you manage your presentation, all slides and polls currently in your subscription are shown as thumbnails. You can scroll through these thumbnails to add or delete slides and polls, and reorder them.

Clicking on a thumbnail selects it. To select a range of thumbnails, select the first one in the range then hold the <Shift> key while you select the last one in the range. To select multiple individual thumbnails hold the <Ctrl> key (or <Command> key for Mac users) while you select the thumbnails.

Reorder thumbnails by dragging the selected thumbnail to the right or left.

Double-click on a thumbnail to present it. This starts the meeting if it hasn’t already been started.

Move the mouse over a thumbnail and click the magnifying glass icon in the upper right corner of the thumbnail to display a preview of the slide or poll in a separate window. You can preview while a meeting is in progress without affecting the presentation.

Right-click on a thumbnail to display a menu of options.

- **Preview** displays the slide or poll in a separate window. You can preview while a meeting is in progress without affecting the presentation.
- **Insert before**… displays a dialog for you to find and insert slide(s) before the selected slide or poll.

- **Insert after**… displays a dialog for you find and insert slide(s) after the selected slide or poll.

- **Delete Selected Slide(s)** deletes the selected slides and polls.

- **Delete All Slides** deletes all slides and polls.

  **Note:** Deleted slides are removed permanently from your subscription. Deleting a poll removes it from the presentation, but the poll itself remains in your subscription until you delete it from the list of saved polls.

- **Next** displays the next slide or poll in the presentation.

- **Previous** displays the previous slide or poll in the presentation.

### Sharing Control Bar

The *Sharing Control Bar* appears whenever you share applications or grant control of the desktop or individual applications, temporarily replacing the *Conference Controls* window.

- Click and hold the **Move** icon to drag it to a new location on the screen. The control bar appears horizontally when you drag it to the top or bottom of the screen, and vertically when you drag it to the left or right. It also snaps to the edges of the screen.

- The **Return** icon ends sharing or control and returns to the *Conference Controls* window in slide sharing mode.
- The **Stop Meeting** icon stops the meeting and returns to the *Conference Controls* window.
- The **Record** icon starts or stops recording the meeting.
- The **Share Desktop** icon shares your desktop with meeting Participants.
- The **Share Applications** icon shares individual applications with meeting Participants.
- The **Grant Control** icon grants control of your desktop or individual applications to a meeting Participant.
- The **Participants** icon displays a list of Participants.
- The **Phone** icon displays the audio control panel.
- The **Chat** icon opens the chat controls.
- The **Minimize** icon minimizes the *Sharing Control Bar*. Click the Windstream icon in the task bar (Windows) or the dock (Mac OS) to redisplay it.
4 Participant Controls

**Note:** The descriptions in this section apply only to Participants using the Flash plugin. The Java-based alternate Participant application is slightly different. If you have questions about the alternate application, please speak with a Customer Care representative.

Joining a meeting as a Participant turns your browser window into a Participant window for viewing the meeting. If you grow or shrink the browser window, the meeting view scales accordingly.
Web Conferencing Controls

The Participant window provides controls for communicating with the presenter(s) and for changing your view of the meeting.

**Raise Hand / Lower Hand**

The **Raise Hand** button signals the presenter that you want to say something. If necessary, the presenter will unmute your line before asking you to speak. You can click the **Lower Hand** button to lower your hand at any time after you raise it. The presenter can also lower your hand.

*Note:* In most cases, particularly in large meetings, it is recommended that you use the chat feature to communicate with the presenter.

**Show Chat / Hide Chat**

When the presenter enables the chat feature, a chat area is displayed at the left of the window. The **Hide Chat** button hides the chat area. The **Show Chat** button redisplay it. If the presenter disables the chat feature, the chat area is hidden.

When the chat area is visible, it displays all chat messages between you and the presenters. If the chat area is hidden and a presenter sends a chat message, the message is displayed in a yellow bar at the top of the Participant window.

To send a chat message, type it into the **Chat with Presenter** text box at the bottom of the chat area and click the **Send** button.

**Show Panel / Hide Panel**

For broadcast audio meetings (audio is received over the Internet), the **Show Chat** and **Hide Chat** buttons are replaced with **Show Panel** and **Hide Panel** buttons.
During broadcast audio meetings, the **Play** icon plays the audio stream and the **Mute** icon mutes it.

**Actual Size / Fit to Window**

When a presenter shares or grants control of applications or the desktop, the view of the presenter’s applications or desktop is scaled to fit the Participant window viewing area. Use the **Actual Size** button if you prefer to see the presenter’s applications or desktop actual size (at the same resolution as the presenter sees them). Scroll bars are added to your Participant window if it is too small to display the entire contents of the presenter’s view.

**Note:** When a presenter grants control of an application to you, the application’s right mouse button functionality is disabled. To access any application’s right mouse button functionality, hold the `<Alt>` key (`<Option>` key for Mac users) while clicking the left mouse button. The `<Ctrl>` C, `<Ctrl>` X and `<Ctrl>` V shortkeys are also disabled for controlled applications. Use the application’s Copy, Cut and Paste menus for these functions.

When you view the presenter’s shared / controlled applications / desktop at actual size, you can use the **Fit to Window** button to scale the view to fit your Participant window, whatever size you make it.

**Full Screen**

The **Full Screen** button displays the Participant window in full screen mode, hiding everything else on your computer screen. The **Raise Hand / Lower Hand** buttons and the **Show Chat / Hide Chat** buttons are also available in full screen mode. However, you must exit full screen mode to send a chat message. You can exit full screen mode with the **Exit Full Screen** button, the `<Esc>` key or the **Exit Full Screen to Chat** button at the bottom of the chat area.
Note: You cannot control a presenter’s applications or desktop in full screen mode. If you are granted control in normal mode, the Full Screen button is not available until control is ended. Likewise, if the Participant window is in full screen mode when control is granted, the window automatically returns to normal mode.

Phone Keypad Audio Controls

Meeting Participants have access to the following audio conference controls:

<table>
<thead>
<tr>
<th>Key</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>*6</td>
<td>Mute line</td>
</tr>
<tr>
<td>*7</td>
<td>Unmute line</td>
</tr>
<tr>
<td>*9</td>
<td>Automated roll call (Name Record must be activated)</td>
</tr>
<tr>
<td>*#</td>
<td>Count number of Participants in conference</td>
</tr>
<tr>
<td>00</td>
<td>Request an operator</td>
</tr>
<tr>
<td>**</td>
<td>List all available commands</td>
</tr>
<tr>
<td>#</td>
<td>Return to conference</td>
</tr>
</tbody>
</table>

System Requirements

Chairperson Requirements

- Internet Explorer on Windows: Requires Java 1.3.1 or higher to install the application. If the user does not have Java, they will have the ability to do a manual download of the application.
- Firefox on Windows: Requires Java 1.3.1 or higher to install the application. If the user does not have Java, they will have the ability to do a manual download of the application.
- Firefox and Safari on Mac: Requires Java 1.3.1 or higher to install the application.

Participant Requirements

- All supported browsers and platforms require Flash 9.0.28 or higher for the best experience or Java 1.3.1 or higher to use the alternative Participant application.
# Glossary of Terms

Windstream uses the terminology below to describe its Conferencing Services. It is helpful to understand these terms before reading this User Guide and using the service.

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Access Code</td>
<td>A 7-digit number the Chairperson uses to access the Conferencing Services and Participants use to join a meeting.</td>
</tr>
<tr>
<td>Attendee</td>
<td>A person who registers for, and attends a scheduled audio conference or Web meeting.</td>
</tr>
<tr>
<td>Broadcast Audio</td>
<td>The audio portion of a Web meeting that is broadcast to Participants over the Internet, rather than over the phone. Broadcast audio is one-way only; Participants can hear but not speak.</td>
</tr>
<tr>
<td>Button</td>
<td>A user interface item that appears as a labeled button. For example:</td>
</tr>
<tr>
<td>Chairperson</td>
<td>The organizer / moderator of an audio conference or Web meeting. The Chairperson sets up and initiates meetings, and accesses all Conferencing Services by entering the passcode.</td>
</tr>
<tr>
<td>Co-presenter</td>
<td>A meeting Participant who has been given the ability to present during a meeting along with the Chairperson and other presenters, if any.</td>
</tr>
<tr>
<td>Conference Center</td>
<td>The front-end of the Windstream Conferencing Service used by the Chairperson to schedule meetings, manage and track registrations, manage recordings and access Conference Controls.</td>
</tr>
<tr>
<td>Conference Controls</td>
<td>The set of features the Chairperson uses to organize presentations, start and conduct meetings and manage presenters and Participants.</td>
</tr>
<tr>
<td>Confirmed Registrant</td>
<td>A person whose registration for a scheduled audio conference or Web meeting has been confirmed.</td>
</tr>
<tr>
<td>Grant Control</td>
<td>The temporary passing of control of an application or desktop from a presenter to another meeting Participant.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>---------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Icon</td>
<td>A user interface item that appears as a graphical icon. For example:</td>
</tr>
<tr>
<td>Invitee</td>
<td>A person who is invited to register for, or attend a scheduled audio conference or Web meeting.</td>
</tr>
<tr>
<td>Link</td>
<td>A user interface item that appears as a link. For example:</td>
</tr>
<tr>
<td>Meeting</td>
<td>A Web or audio conference.</td>
</tr>
<tr>
<td>No-Show</td>
<td>A person who registers for, but does not attend a scheduled audio conference or Web meeting.</td>
</tr>
<tr>
<td>Participant</td>
<td>A person who attends an audio conference or Web meeting.</td>
</tr>
<tr>
<td>Passcode</td>
<td>A 4- to 9-digit number the Chairperson enters along with the access code to log in to the Conference Center and access all conferencing features.</td>
</tr>
<tr>
<td>Presentation</td>
<td>A series of slides and polls displayed during a Web meeting.</td>
</tr>
<tr>
<td>Presenters</td>
<td>The Chairperson and any co-presenters, collectively.</td>
</tr>
<tr>
<td>Poll</td>
<td>An interactive slide displayed during a Web meeting presentation with a question that Participants can submit responses to. The results are automatically tallied and can be displayed back to the Participants.</td>
</tr>
<tr>
<td>Registrant</td>
<td>A person who registers for a scheduled audio conference or Web meeting.</td>
</tr>
<tr>
<td>Sharing</td>
<td>The temporary showing of an application or desktop on a presenter’s computer to all meeting Participants.</td>
</tr>
</tbody>
</table>
