

## INTERNET

# A smart solution for your critical business needs

Internet from Windstream Enterprise keeps you working, not waiting. Internet provides your business with speeds of up to 1 Gbps and the same speed for uploads and downloads to move large data quickly. Plus, you receive the same reliability and performance of a traditional T1.

## A more reliable, stable solution

Unlike cable Internet shared access lines, dedicated Ethernet Internet from Windstream Enterprise ensures traffic jams are bypassed. For businesses that depend on Internet at peak usage, cable Internet is a risk because your business is always competing for bandwidth with other cable customers.

### Features

Speeds up to 1 Gbps

Equally fast downloads and uploads

Dedicated connection provides better reliability and more consistent performance than a shared cable connection

Tremendous bandwidth provides access for small, medium and large businesses

Ethernet speeds are consistent throughout the day so you always get your peak speed, 24 x 7

Service Level Agreement (SLA) guarantees 99.99% uptime

### Benefits

Efficient utilization: Securely transfer large data, utilize hosted applications and take advantage of flexibility to add speed at any time

Dedicated connection: Enjoy maximum reliability, specifically during peak Internet usage periods

Highly scalable: Easily increase bandwidth without costly equipment changes

Simple plug and play setup: Reduce equipment setup and operation costs

Symmetrical connection: Decrease the time spent waiting for large files to upload

Better value: Acquire greater bandwidth at a lower cost per Mbps than T1, Frame Relay or Private Line

WE Connect portal and mobile app: Gain greater visibility and reporting on your network performance and availability by location at a glance with our intuitive, online dashboard. Plus, track and place orders, view and pay bills, manage settings and submit support tickets, from any device, anywhere.
