Transform your network and customer experience

Growth-oriented enterprises are struggling to deliver the personalized, secure, anytime, anywhere experience customers and employees expect. Traditional networks can’t support advances in cloud and mobile applications. Companies have coped with this challenge by adding more MPLS bandwidth, or by combining MPLS with dedicated Internet access, DSL, cable and Ethernet—the results are costly and time-consuming to manage.

3X Global IP traffic will increase threefold over the next 5 years¹
83% of enterprise workloads will run in the cloud by 2020²

SD-WAN Concierge™

SD-WAN Concierge from Windstream Enterprise combines the intelligent, dynamic traffic routing of SD-WAN with consulting and professional services to help you create a customized hybrid WAN solution that utilizes the best available access options.

- **Application visibility & control**
  Centrally manage and deploy routing policies via the WE Connect portal

- **Dynamic WAN selection**
  Preserve application performance based on pre-set thresholds

- **Application optimization**
  Monitor and improve network paths for higher quality

- **Dynamic IPsec deployment**
  Enable end-to-end encryption for secure data transmission over public networks

- **Security**
  Ensure PCI DSS compliance with IPsec encryption and the ability to manage security policies

- **Managed service**
  Technical service managers will continuously and proactively monitor and optimize the solution on your behalf

- **Flexible connectivity**
  Unify disparate locations with any access and connect to leading cloud service providers with SD-WAN Cloud Connect

- **Dual active links**
  Increase resiliency with redundant and diverse connections at each location
How does SD-WAN Concierge deliver on your needs?

**Optimize Your Network and Costs**
Converge voice, data and video applications on the same IP backbone.

Deliver cloud-based apps with high performance and virtually no downtime.

Augment MPLS connections with a second WAN, using any provider and access type.

Use cost-effective and readily available access methods.

Replace “skinny” T1s with lower-cost, higher-bandwidth broadband alternatives.

Reduce your per-Mbps cost by up to 90%.

**“Mobile First” WE Connect Portal**
Gain complete visibility and control.

View real-time performance in a centralized dashboard.

Instantly modify business and security policies.

Customize naming and tagging of devices and destinations to simplify reporting.

**Improve security**
Comply with PCI DSS to protect data at rest and in transit.

Create a virtual private network on top of existing connections.

Encrypt all traffic with IPsec to secure any access type.

---

Why Windstream Enterprise?

**Leading SD-WAN Provider**
Windstream Enterprise is the leading SD-WAN service provider with thousands of customers.

**Advanced Technology Platform**
VeloCloud, now part of VMware, was named a leader in the Gartner Magic Quadrant for WAN Edge.¹

**SD-WAN Concierge**
Your network environment is continuously, proactively monitored and optimized for peak performance by Windstream Enterprise experts.

**SD-WAN Cloud Connect**
Optimize connectivity to cloud service providers by bringing applications closer to end-users to reduce latency.

**Cloud Core™ Architecture**
Get improved cloud-based application performance with diverse, low-latency connections to cloud providers—backed by our heritage as an Internet Service Provider.

**Windstream Enterprise SD-WAN Community**
A forum to learn and collaborate. Ask questions, share best practices with peers, learn about new enhancements and provide feedback. Join now.
