

MANAGED NETWORK SECURITY

Comprehensive and customized security solutions to fit your needs

Network security is a fundamental requirement for all businesses today. The growing number and complexity of security threats requires a highly skilled team of security professionals seamlessly integrated to protect against hackers, malware and the many other virtual threats targeting businesses every single day.

Managed Network Security

Managed Network Security from Windstream Enterprise provides a robust foundation to protect network resources and keep valuable information safe with a comprehensive, Unified Threat Management solution.

Unified Threat Management features include content filtering, anti-virus, application control and intrusion prevention.

Managed Network Security provides custom, comprehensive, real-time protection against Internet attacks, defending and protecting your entire office-computing environment against the latest generation of Internet threats.

Unified Threat Management

Content filtering

Filters web content and controls what users can view/download based on customizable rules and categories.

Anti-virus

Prevents, detects and removes malicious software, including computer viruses, Trojan horses, spyware, and adware.

Application control

Protects desktops and servers by allowing or denying application usage based on pre-defined, customized business policies.

Intrusion prevention

Uses real time intelligence to pro-actively detect, prevent and mitigate malicious traffic from accessing the network.

Simplified bundles for Managed Cloud and CPE Firewalls

	Basic	Advanced	Premium
Firewall	+	+	+
VPN	+	+	+
Weekly Logs & Reporting	+	+	+
Web Content Filtering		+	+
Anti-Virus		+	+
Intrusion Prevention System		+	+
Application Control			+

Features

Managed Cloud Firewall

A geographically diverse and redundant firewall that resides in the cloud, protecting your entire network at the edge from threats thereby reducing network vulnerability and freeing up bandwidth for legitimate traffic.

Managed CPE Firewall

A Windstream Enterprise managed, on premises-based firewall that delivers unmatched performance and protection while simplifying your network. We offer models to satisfy any deployment requirement, for enterprises and data centers.

VPN Access

Allows remote users or locations to connect securely to your organizations SD-WAN and MPLS VPN networks.

Email Security*

Scans your email for a broad spectrum of dangerous or inappropriate content and filters it out before it can penetrate network boundaries, gateways or mail servers.

Web Security*

Secures and protects your Internet traffic from destructive viruses and phishing threats while maintaining control of Web content for enforcement of acceptable usage policies.

Logging and Reporting

Logs and reporting created weekly for all solution components.

24/7 Support

Direct access to dedicated security professionals who assist with real-time change requests.

Benefits

Reduce costs

Combining key network security functions into a single platform along with management helps you achieve significant cost savings for your organization.

Real-time threat protection

Ensure real-time protection of your network with robust Intrusion Prevention and Anti-virus protection solutions.

Minimize risk

Enforce company policies and ensure malicious content or employees using unapproved applications are not stealing valuable bandwidth, slowing your network to a crawl.

Ensure compliance

Meet regulatory standards and protect your business from legal or compliance risks. The cloud firewall is PCI Compliant.

Geographic redundancy

Automatic cloud firewall failover assures that no matter what, any site connected to an SD-WAN or MPLS network has secure and dependable Internet access.

Improve productivity

Unburden your IT staff from daily security tasks by letting Windstream Enterprise manage your security infrastructure.

* Email and Web Security are add-ons to Managed Network Security

About Windstream Enterprise

Windstream Enterprise collaborates with businesses across the U.S. to drive digital transformation by delivering solutions that solve today's most complex networking and communication challenges.
