Unified Communications as a Service

Cloud-based communications and collaboration for the digital workplace
Improve productivity and collaboration by enabling employees to connect anywhere, using any device.

The ways in which we communicate and work are changing. To remain competitive, businesses must enable their employees to easily connect with customers and collaborate with colleagues, whether they are in the office or on the go.

The evolution of technology is driving a whole new set of customer demands. Customers now expect instant access to your business and immediate responsiveness from your employees. Customers are no longer loyal to any one business or brand, making their satisfaction essential to your success.

To keep up with customer demands, businesses must empower their employees with the cloud-based tools they need to succeed. Outdated, premises-based systems simply cannot support the level of responsiveness and flexibility that your employees need to work efficiently.
Maintain a collaborative edge and enrich the customer experience

Improve workplace productivity and customer satisfaction by enabling your employees to work and collaborate efficiently, whether they are in the office, remote or travelling.

Unified Communications as a Service (UCaaS) from Windstream Enterprise empowers your employees with the communication and collaboration tools they need - like voice, chat, presence, SMS text messaging, web/audio/video conferencing and more - on any device, so they can remain connected and responsive wherever they are.

Backed by a world-class network and supported by a 99.99% uptime SLA, UCaaS ensures your employees remain available and connected no matter what. Whether your organization has a staff of 100 or 10,000, our highly scalable solutions—from Avaya, Mitel and our own OfficeSuite UC—empower you to focus on your core business goals while WE manage your communications needs.

25 – 30% by the end of 2021, it's estimated that 25-30% of the workforce will be working from home multiple days a week.2

63% of business leaders agree the cloud can make their entire organization more business agile and responsive.1
UCaaS is a perfect fit for enterprises:

- Looking to increase productivity and customer engagement through enhanced collaboration and mobility tools
- Dealing with aging telephony equipment and/or limited feature sets
- Planning to unify their locations under a single system
- Experiencing fluctuations in customer demands
- Requiring business continuity and disaster recovery
- Desiring a scalable solution that can accommodate rapid growth—all while avoiding capital expenditures
Game changing benefits of UCaaS

**LET BUSINESS TAKE PLACE EVERYWHERE**
Your employees can work and collaborate from anywhere using desk phones, smartphones and laptops.

**LOWER IT AND ADMINISTRATIVE COSTS**
An easy-to-use, intuitive customer portal helps reduce the time and resources required to manage your phone and communications system.

**UNIFY EMPLOYEES AND SITES**
One centrally managed system provides seamless collaboration and communications across all of your locations.

**DRIVE SCALABILITY**
A cloud-based model makes it easy to add or remove services, users and locations as needed.

**ENSURE BUSINESS CONTINUITY**
Secure everything you need in the cloud and remain reachable to customers even if your physical office is unable to open.

**ENHANCE BUSINESS APPS**
Integrate and enhance common business applications—from third-party providers—to improve productivity and make the most of your investments.

**INTEGRATE WITH CONTACT CENTER SOLUTIONS**
Easily integrate with contact center solutions to provide a best-in-class customer experience.

**GET ALWAYS-ON RELIABILITY**
Optimized availability and security delivers maximum uptime to support innovation and growth.
UCaaS from Windstream Enterprise breaks down barriers to allow collaboration
