DARK FIBER

Private, high-capacity network infrastructure customized to your needs

Unique routes from Windstream Wholesale allow you to build tailored, point-to-point solutions to cost-effectively expand your network footprint.

Secure, flexible and scalable

Build and maintain complete control of your network, leveraging our vast 150,000 mile nationwide fiber footprint. A private network gives you the power of a carrier to maximize your data’s security, availability and speed without the high capital expense required to deploy your own fiber.

Why Dark Fiber from Windstream Wholesale?

Customer-defined bandwidth/latency
Privately-operated optical fiber network
150,000 mile nationwide fiber availability
Physically dedicated to and completely managed by the customer
Multiple contract options (i.e., IRU and lease)
