Intelligent IP cameras

Gain better business intelligence while improving security with intelligent IP cameras that are simple to deploy, configure and manage.

**Advanced analytics**
Industry-leading analytics and machine learning capabilities provide business intelligence to improve employee productivity and customer experience.

**Centralized cloud management**
An intuitive, online dashboard enables secure remote management of all cameras.

**Everything’s included**
Video storage and powerful hardware are included so there’s no need for NVR software or extra analytics packages.

**Highly secure**
Meet compliance requirements with automatically purchased publicly signed SSL certificates, encrypted management data and additional cloud archive options.

**Bandwidth conscious**
Video is stored on the camera ensuring mission-critical network activities get the bandwidth they need.

**Always up-to-date**
Feature releases, firmware updates and bug fixes are pushed automatically.
How do IP cameras deliver on your needs?

Better business intelligence
Motion heat mapping analytics and other data is gathered for behavior tracking, public safety and more.
Object detection provides business insights using computer vision and machine learning which increase accuracy over time.

Encryption/network security
Automatic publicly signed SSL certifications
Analytics are anonymized to ensure privacy while providing intelligence
No NVR means one less point of vulnerability during cyber-attacks

Beyond simple
Centralized cloud management makes it easy to deploy, configure and operate
Online dashboard and processing/storage of video on the camera itself eliminates vulnerable NVR/VMS software.
