IP CAMERAS

Go beyond surveillance to gain better business intelligence

As customer demands change and business needs grow—organizations must leverage all the tools available to gather the rich business intelligence they need. Powerful, intelligent IP cameras from Windstream Enterprise go beyond surveillance to provide your organization with detailed analytics for a comprehensive view of customer behaviors to help drive business growth while protecting your business.

IP cameras

Gain better business intelligence while improving your security with IP cameras. More than video surveillance, these intelligent, cloud-managed cameras are incredibly simple to deploy, configure and manage, providing you with valuable business insights while protecting your organization against cyber-attacks and eliminating the need for vulnerable NVR.

Advanced analytics
Industry-leading analytics and machine learning capabilities provide rich business intelligence

Centralized cloud management
An intuitive, online dashboard provides secure management of all your cameras from anywhere in the world, no extra software required

Everything's included
With video storage and powerful hardware—there's no need for NVR software or extra analytics packages

Highly secure
Cameras automatically purchase publicly signed SSL certificates and all management data is always encrypted by default

Bandwidth conscious
Video is stored on the camera—not in the cloud—ensuring mission-critical network activities get the bandwidth they need

Always up-to-date
Feature releases, firmware updates and bug fixes are always pushed automatically and at no additional cost

How do IP cameras deliver on your needs?

Better business intelligence

Gathers motion heat mapping analytics and other data for customer behavior tracking, public safety and more

Object detection provides deep business insights without bulky servers by using computer vision and machine learning that increases accuracy over time

Encryption/network security

Automatic publicly signed SSL certifications

Analytics functionalities are anonymized to ensure privacy while providing intelligence

No NVR means one less point of vulnerability, as NVR/DVR is the second most targeted piece of the networking stack during cyber-attacks

Beyond simple

Centralized cloud management makes it exceptionally easy to deploy, configure and operate

Online dashboard combined with processing and storage of video on the camera itself eliminates the need for vulnerable NVR/VMS software

Camera models

Model	**MV21** Fixed dome camera for indoor security	**MV12** Compact dome camera for indoor security	**MV71** Fixed dome camera for demanding environments
Storage	128GB high write endurance solid state storage	256GB integrated high-endurance solid state storage	128GB high write endurance solid state storage
Video	720p video recording with H.264 encoding	1080p video recording with H.264 encoding	720p video recording with H.264 encoding
Lens	3-10mm vari-focal lens	114° horizontal field of view (FOV) captures a whole scene	3-10mm vari-focal lens
Illumination	IR illumination up to 30m or 98ft		IR illumination up to 30m
Wireless		802.11ac wireless	
Audio		Microphone for audio recording
