

OFFICESUITE WHITE LABEL

10 Reasons to Choose OfficeSuite UC[®] White Label

Stay ahead of the growing market demands and help your customers transform the way they do business with OfficeSuite UC[®] White Label. This unique and advanced communications solution unifies business calls, faxes, messages and meetings in the cloud to improve productivity, ensure business continuity and enable employees to work and collaborate from virtually anywhere using any device.

01 Rapid Market Entry

Offer a powerful UC solution without the time and costs of development. OfficeSuite UC White Label enables you to start selling in just a matter of weeks, not months.

02 Complete Branding Control

Facilitate rapid deployment with a wholesaler-branded, self-administered website that gives you the control to quickly and easily brand the service as your own.

03 Unique Technology

Leverage our unique software; the entire system is controlled from the cloud via a single online dashboard, not by the phone, to simplify provisioning and management. No phone reboots and no programming or data stored in the plug and play phones.

04 End-user Control

Enable end-users to make changes in seconds to reduce help-desk requests for day-to-day functions. Up to 48-button phones are easily programmed by users on the web via point and click, with changes made immediately on their phones.

05 Feature Functionality Across All Sites

Help your customers unify multiple locations. Features like voicemail, Call Center Services (ACD) and intercom work within and across locations with no extra setup, linkages or services required.

06 Future-proof

Receive free upgrades and enhancements to ensure your end-users always have the most current software to continue supporting their employees and serving their customers.

07 Mobility In, Out and Between Offices
Your customers benefit from one-of-a-kind features like Hot Desking (use any phone in any office, in any location), Multi Desking (connect to any five devices at once) and Twinning (send calls to desk and mobile phones simultaneously) that allow people to move freely and work from anywhere without missing calls.

08 Disaster Avoidance
Safeguard your customers and keep them connected no matter what. Easily make, take or reroute all your end-user communications anywhere, anytime, from any browser. With failover options like geo redundancy and SD-WAN, calls get delivered even if your customer's primary network goes down.

09 Guaranteed Quality Where it Matters Most
Optimize performance and provide an exceptional customer experience. Use any Internet connection to connect to OfficeSuite UC White Label or guarantee quality with our managed network for 99.99% uptime performance.

10 Easiest System to Use and Manage
Receive unprecedented visibility and control with our user-friendly dashboard. The intuitive, widget-based design is so easy to use that you or your end-users can self-manage, no need to call in technical reinforcements.
