

GUEST INTERNET SOLUTIONS

Enhance the guest experience with high-quality Internet access

Guests today expect reliable, high-speed Internet access when staying away from home. Whether it be for business or pleasure, your guests rely heavily on devices and applications that require secure and dependable Internet options.

The Windstream Enterprise Hospitality Advantage

Windstream Enterprise is an industry leader in designing, deploying and managing high-speed Internet access solutions for properties nationwide. Our HSIA practice supports over 100,000 guest rooms and is growing rapidly.

Having a solid network partner, which provides round-the-clock, full-service support by hospitality-trained engineering and help desk personnel is a strategic asset. Our team delivers proactive monitoring of your guest Internet access services and your data network from our 24/7 enterprise-level, U.S.-based NOC.

We've helped hundreds of properties like yours upgrade their guest Internet experience easily, rapidly and cost-effectively to the latest wireless and performance standards—and we can do the same for you.
