F⊕RTINET® | WE

Transform your network and customer experience

Enterprises today are struggling to deliver the personalized, secure, anytime experience customers and employees expect. Traditional networks can't keep up. Using a robust FortiGate appliance, SD-WAN employs innovative software-defined networking (SDN) and network functions virtualization (NFV) to deliver advance unified threat management (UTM) features that protect your network and enable cloud-ready and cost-effective networking. SD-WAN is the ideal framework for a SASE (Secure Access Service Edge) solution.

The SD-WAN market is expected to surpass
$4 billion by 2025.[1]

SD-WAN Concierge™

SD-WAN Concierge from Windstream Enterprise combines the intelligent, dynamic traffic routing of SD-WAN with consulting and professional services to help you create a customized hybrid WAN solution that utilizes the best available access options.

Application visibility & control
Centrally manage and deploy routing policies via the WE Connect portal

Dynamic WAN selection
Preserve application performance based on pre-set thresholds

Application optimization
Monitor and improve network paths for higher quality

Dynamic IPsec deployment
Enable end-to-end encryption for secure data transmission over public networks

Security
Protect customer data and your brand with unified threat management features

Managed service
Remove the burden of management with a fully-managed service and an intuitive self-service portal

Flexible connectivity
Unify disparate locations with any access and connect to leading cloud service providers with SD-WAN Cloud Connect

Dual active links
Increase resiliency with redundant and diverse connections at each location

How does SD-WAN Concierge deliver on your needs?

Optimize your network and costs

Converge voice, data and video applications

Deliver cloud-based apps with high performance

Augment MPLS connections with a second WAN, using any provider and access type

Use cost-effective and readily available access methods

Replace T1s with lower-cost, higher-bandwidth broadband

Reduce your per-Mbps cost by up to 90%

Scale to support connections up to 12 Gbps

WE Connect Portal

Gain total visibility and co-management control of network solutions with this award-winning customer portal

View real-time performance by location, device and end user

Stay connected anytime, anywhere with mobile access from smart devices

Improve security

Ensure intrusion protection, URL filtering, application control and SIEM protection with unified threat management

Create a virtual private network on top of existing connections

Encrypt all traffic with IPsec to secure any access type

Why Windstream Enterprise?

OfficeSuite UC Concierge included when added to SD-WAN Concierge. LAN Services Concierge included when added to SD-WAN Concierge and OfficeSuite UC Concierge. White glove experience at no extra cost.

Leading SD-WAN provider
Windstream Enterprise is the leading SD-WAN service provider with thousands of customers.

Leading security provider
Fortinet was named a leader in the Gartner Magic Quadrant for network firewalls.[2]

White glove experience
Receive OfficeSuite UC® Concierge when purchased with SD-WAN Concierge. Include LAN Services Concierge when added to SD-WAN and OfficeSuite UC Concierge services.

Advanced SD-WAN technology
Fortinet was named a leader in the Gartner Magic Quadrant for WAN Edge.[3]

SD-WAN Cloud Connect
Optimize connectivity to cloud service providers by bringing applications closer to end-users to reduce latency.

Cloud Core™ architecture
Get improved cloud-based application performance with diverse, low-latency connections to cloud providers—backed by our heritage as an Internet service provider.

Windstream Enterprise SD-WAN Community
A forum to learn and collaborate. Ask questions, share best practices with peers, learn about new enhancements and provide feedback. Join now.

Cloud-enabled connectivity, communications and security—guaranteed.
