OfficeSuite UC®

Cloud communications for a new world of business
One unified communications solution for all your needs

**Access anywhere, any device**

Transform how you do business by giving your employees the freedom to work from anywhere. Since our system revolves around users, not devices, user data can be shared amongst all of your devices. Whether on-site with a customer, traveling or working remotely, the features and services are available from anywhere. Ensure business continuity and avoid costly downtime during disasters.

**The most secure communications system**

Unlike other providers, we own the code and utilize unique technology instead of SIP or open source to help you meet SOC2 and HIPAA compliance requirements. OfficeSuite UC delivers a proprietary design to encrypt meetings and messages and secure everything in the cloud—no data or information is stored on the phone where it can be vulnerable to theft. We enlist our own development team who is dedicated to rapid advancements based on our customer’s needs and requirements.
