UNIFY ALL EMPLOYEES AND SITES

Use one system for your entire organization without expensive wiring or IT support. Experience seamless collaboration and communicate across locations, while reducing IT complexity.

Administer changes easily for every employee and site from one online portal
Leverage features and extension dialing across all locations
Move between offices, share workspaces and use any phone as your own

AVOID DISASTERS AND ENSURE BUSINESS CONTINUITY

Secure everything you need in the cloud and remain reachable to customers during disasters even if your physical office isn't open.

Quickly and easily manage any feature or setting remotely
Use any device to make calls, check voicemail, fax, chat or video conference
Meet face-to-face and collaborate with clients in real time from anywhere
Business communications unlike any other

The easiest system to use and manage

If you are relying on the features of a new system for increased productivity and flexibility and they aren’t easy to use, then there’s no value in a new system. Because we develop our own software, OfficeSuite UC® is designed to be user-centric, not device-centric. Our advanced system is so easy to use, that every employee can access and manage the features and services of the system independently, reducing IT help desk dependency and drastically enhancing productivity and efficiency organization-wide.

2020/2019 Gartner Magic Quadrant for Unified Communications as a Service, Worldwide

With OfficeSuite UC®, Windstream Enterprise continues to show our commitment to innovation and enterprise capabilities. For the second consecutive year, Gartner has included Windstream in the Magic Quadrant for Unified Communications as a Service, Worldwide report.

Gartner
Access anywhere, any device

Transform how you do business by giving your employees the freedom to work from anywhere. Since our system revolves around users, not devices, user data can be shared amongst all of your devices. Whether on-site with a customer, traveling or working remotely, the features and services are available from anywhere. Ensure business continuity and avoid costly downtime during disasters.

The most secure communications system

Unlike other providers, we own the code and utilize unique technology instead of SIP or open source to help you meet SOC2 and HIPAA compliance requirements. OfficeSuite UC delivers a proprietary design to encrypt meetings and messages and secure everything in the cloud—no data or information is stored on the phone where it can be vulnerable to theft. We enlist our own development team who is dedicated to rapid advancements based on our customer’s needs and requirements.
Features to make your employees even more productive

Because we develop our own software, features are added often and updated frequently—at no additional cost.
