

# Innovation you can thrive on

As a private company with a strong balance sheet, Windstream Enterprise is better positioned than ever to offer the innovative solutions you need to thrive on. We are committed to accelerating digital innovations that connect your people in more personal and productive ways.

## Extraordinary times call for extraordinary solutions.

Windstream Enterprise is able to take advantage of new technologies to innovate faster, adapt to changing markets better, and drive business results more efficiently for our customers. We look forward to delivering continuous value and delight from cloud-optimized, industry-leading solutions that help you navigate today's most complex IT and networking challenges.

## Windstream Enterprise is focused on the technology that drives your strategic growth. We make that happen with:

**Our products**—We develop software-based solutions that enable us to offer leading-edge services such as SD-WAN, XCaaS, Managed Network Security and Cloud Connect.

**Our network**—With an almost 170,000 fiber route mile SDN network, a 50-market fixed wireless network, 16,000 lit buildings and thousands more near-net buildings, we can support multi-location customers of any type anywhere across the U.S. and Canada.

**Our digital experience**—The award-winning WE Connect portal empowers customers to monitor, manage and configure all their services, while advanced analytics provide predictive, actionable insights.

**Our approach**—We offer high-touch, collaborative engagements with knowledgeable team members in a valued relationship. No matter the size of your enterprise, we'll work with you to develop a solution centered on your business.
