

You need a solid foundation for reliable business communications. WE will help.

Avoid obsolescence by proactively upgrading to a next-generation UC solution that will position your business to thrive and save money.

Cloud-based phone system with hundreds of features and unlimited calling

Company-wide chat and mobile applications, including SMS messaging

Video and audio conferencing with web collaboration tools

Secure, face-to-face meetings from anywhere

Your outdated voice services may no longer be providing the tools your employees need to collaborate remotely both internally and with customers. Furthermore, the underlying technology will soon be obsolete. Delaying the inevitable upgrade could result in higher costs, lost productivity and downtime.

Why OfficeSuite UC[®]?

Our award-winning 100% cloud-based phone, mobility and unified communications solution empowers your employees to work from anywhere, while improving efficiency and collaboration.

Unify all employees and sites within a single, centrally managed system and reduce reliance on help desk support

Enable remote working capabilities and management tools to meet, chat, collaborate anywhere from any device

Secure everything you need in the cloud while ensuring business continuity

Integrate with popular 3rd party applications via our standards-based API

Get more features for less at ~\$25 per business voice line*

Run on the network of your choice (Windstream Enterprise or another provider)

Add Windstream Enterprise SD-WAN solutions for even better voice and application visibility, resiliency and performance

Stay ahead of the industry shift to eliminate outdated copper-based services such as PRI T1s, traditional phone lines (POTs) and data T1 circuits. Upgrade your connectivity to save costs and take advantage of advanced UC features.

Support modern business models that heavily rely on remote working capabilities and management tools

Avoid increasing costs tied to leveraging outdated access mediums

Position yourself for growth and profitability, without heavy upfront investments or costly software updates

Exceed employee and customer expectations with feature-rich technologies, including high-speed Internet, mobility, security and superior, real-time video and audio collaboration

Gain flexibility, resiliency and scalability and vendor consolidation via next-gen, cloud-based technologies

Achieve business continuity and network diversity cost-effectively with the addition of SD-WAN and secondary low-cost access such as broadband, 4G or fixed wireless

Access Windstream Enterprise's intuitive, award-winning WE Connect portal to self-manage all services, from anyplace, on any device

Windstream Enterprise has a wide portfolio of unified communications and advanced network services. We can help to create a custom migration path that will future-proof your infrastructure and lay the foundation for an ever-changing landscape.
