WE

Collaborate with anyone, anywhere, via any device

Enjoy effortless collaboration with a reliable and secure virtual meeting space.

Meet face-to-face from anywhere

Use any desktop or mobile device

Eliminate travel; virtually connect with employees and clients

Host and record meetings and training events

Meet OfficeSuite Live

With OfficeSuite Live, meetings are hosted with or without the need for a desktop or mobile app, allowing users to simply host or join via a browser session (Chrome recommended). OfficeSuite Live offers productive one-on-one meeting and group collaboration sessions between colleagues with the ability to use standard enterprise features.

Collaborate with secure video and audio

Help teams securely meet in a virtual environment with our end-to-end encrypted cloud-based platform.

Stay connected to your clients and employees

Host and join video and audio meetings with up to 250 participants from any device. Integrated chat and emojis support non-verbal collaboration.

Gain superior visibility and control

Manage user licenses in real time from any device utilizing our OfficeSuite Portal.

Benefit from live translation and transcription

Seamlessly communicate in real-time across global boundaries and empower individuals and businesses to connect and collaborate effectively, regardless of linguistic differences.

powered by aws

Host, meet and share in real time

Contact center integration
Allow agents to provide video and screen-sharing support.

Control meeting participants
Mute all audio and video or individuals, delay entry for participants, remove participants and more.

Easy cloud recording
Record meetings with one click on any app, including mobile, and save them in the Secure AWS Cloud for easy sharing.

Host transfer
Transfer co-host controls to any participant via the participant menu.

Instant calls
Place 1:1, face-to-face calls within the WE Connect app via a single click.

Integrated chat
Chat instantly with one or all meeting participants.

License management
Add, allocate, change and delete user account licenses through our OfficeSuite portal.

Live closed captioning
Enable automated closed captioning for any meeting.

Live translation
Offer live, translated audio in 11 languages.

Maximize participants
Enable guests to use a mobile device or computer to join a meeting to best suit their preferences.

Outlook integration
Schedule meetings and manage meeting preferences via an outlook add-in.

Privacy controls
Leverage blurred or virtual backgrounds for privacy.

Quick launcher
Start and join right from our WE Connect portal or meet.officesuite.live.

Scalable meeting capacity
View up to 25 participant videos and up to 250 screen viewers with full audio participation either with VoIP or PSTN dial for every single meeting.

Seamless sharing and collaboration
Share one application or full desktop view with a single click, as well as modify documents on the fly.

Secure and compliant
Encrypt all presentation content at the application layer using SSL. Meetings, presentations, recordings and chat are available to user endpoints only (unless shared) with no server-side data retention.

Our managed connectivity, communications and security solutions are innovative. Your business outcomes are imperative.
