WE

Improve performance and lower costs with a fast, reliable connection

Network demands are increasing and continuously evolving, resulting in IT departments struggling to support high-demand, high-bandwidth applications that drive 24/7 business operations and productivity.

Flexible bandwidth
Support your growth in application traffic with speeds up to 10 Gbps

Highly reliable
Achieve resiliency and exceptional performance

Cost effective
Benefit from lower costs per Mb versus legacy access technology

Secure high-bandwidth connectivity to eliminate downtime and lower costs to deliver a better customer experience

Businesses today need network connections that can replace legacy Time Division Multiplexing (TDM) access technology to add robustness, scalability, support and redundancy for mission-critical, cloud-based, applications. With Ethernet access from Windstream Enterprise, we take the complexity out of network connection management, ensuring continuous quality and reliability.

Services that rely on TDM technology are in jeopardy
TDM access technology is nearing end-of-life, becoming less reliable for the end user, and impractical for service providers to maintain. Most providers are working to retire their TDM services and those who will continue to support TDM are likely to implement hefty price increases to cover their costs.

TDM can't support today's data and voice services
Most TDM circuits supporting MPLS, T1 and POTs are single threaded and lack the resiliency and bandwidth to support the explosion of cloud-based apps that are critical to many organizations. This invariably leads to a poor end-user experience.

Upgrade to increase bandwidth and resiliency
Lower costs, increase bandwidth and resiliency with a next-gen solution. By migrating to fully managed Ethernet access or cable broadband, you'll benefit from secure, high-performance connectivity that enables your business to run the most bandwidth-hungry applications.

For the best data and voice performance, consider upgrading to Windstream Enterprise SD-WAN and UCaaS.

How does Ethernet access address your business needs?

Business continuity
Combine Ethernet with our Fixed Wireless Ethernet access to experience the highest availability, afforded by having two completely diverse connection paths.

Capacity and performance
Receive the capacity and performance needed for business-critical applications, ensuring an excellent customer experience.

24/7 support
Let us do all the work. The design, installation and maintenance is managed entirely by Windstream Enterprise with dedicated account management.

Why Windstream Enterprise?

Expert teams and a comprehensive portfolio of services
Windstream Enterprise has over 70 years of network experience and provides a broad range of access methods, including Ethernet, cable broadband and Fixed Wireless, which can connect all of our services. In addition, we deliver integrated SD-WAN, UCaaS, security and cloud solutions that will position your business for future growth and success.

Customized approach
We take the time to understand your needs and goals and work closely with your IT teams to build, deploy and manage a solution that is tailored specifically to your business.

Unparalleled service and support
Our dedicated teams provide local service and support to help with design and deployment. Plus, our service is backed by our elite level of service and support.

Cloud-enabled connectivity, communications and security—guaranteed.

Windstream Enterprise drives business transformation through the convergence of our proprietary software solutions and cloud-optimized network to unlock our clients' revenue and profitability potential. Our managed services streamline operations, enhance productivity and elevate the experience of our clients and their end users while securing their critical data and brand reputation. Analysts certify Windstream Enterprise as a market leader for our product innovation, and clients rely on our unrivaled service guarantees and best-in-class management portal. Businesses trust Windstream Enterprise as their single-source for a high-performance network and award-winning suite of connectivity, collaboration and security solutions—delivered by a team of technology experts whose success is directly tied to our clients' complete satisfaction.
