

Make the most out of your Microsoft Teams investment

Unified communications (UC) and voice solutions from Windstream Enterprise plus Microsoft Teams provides an enhanced calling and administration experience directly from the Teams app via desktop, tablet or mobile devices.

Integration with Microsoft Teams

Microsoft Teams is one of the most popular collaboration tools for calling, chatting and file sharing. With Windstream Enterprise Dynamic IP and Unified Communications as a Service (UCaaS), you can utilize Microsoft Teams for advanced telephony capabilities as part of your comprehensive collaboration solution.

Leverage an expanded feature set

Enable support for Teams, as well as IP phones and hardware

Collaborate anytime, anywhere using any device

Reduce expenses

Empower your business

Integrate Windstream Enterprise UC and voice solutions with Teams to achieve the following benefits:

Greater support and more capabilities

Enable global calling, auto-attendants, bulk administration tools, contact center integration and other powerful enterprise features—all backed by a team of technology experts.

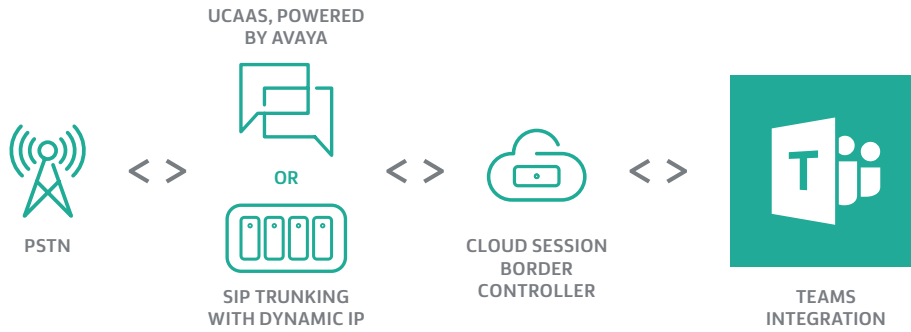

Your trusted partner

Depend on our expertise to support a complete array of Dynamic IP, UCaaS and networking solutions, optimizing collaboration and business agility.

Optimized IT budget

Minimize reliance and expense related to legacy, on-premises hardware, and take advantage of our competitively priced calling plans.

Powerful. Simple. Easy to use.

Fully secure and approved for use.

True native integration to Office 365, with no additional software.

Implementation through an intuitive web portal.

Why Microsoft Teams Integration with calling from Windstream Enterprise?

Leverage our expertise in solving the most complex collaboration challenges for enterprise and mid-market customers. We can help you incorporate our calling services with the reliability of SD-WAN and Security Service Edge (SSE), a fully managed networking and security solution.

Direct Routing via Dynamic IP

- + On-premises phone systems can be utilized or easily replaced with Teams
- + Consolidating separate network connections helps you save money
- + Survivability keeps you doing business in the event of a network outage
- + Competitive long distance rates let you make cost-effective domestic or international calls

User Integration via UCaaS

- + Advanced UCaaS features and functionality enhance Teams as a primary communications interface
- + Access to contact center, IVR and workforce engagement platforms optimize the user experience
- + Extensive lineup of desktop and conference phones—along with Teams softphones—provide user flexibility

Cloud-enabled connectivity, communications and security—guaranteed.
