

Virtual meeting

Features that work best for your business.

Collaboration Features	HD Meeting	Definition
Max meeting size	1,000	Establish the maximum number of individual attendees able to join a single meeting.
1:1 Voice and video calls	✓	Make instant person-to-person voice and video calls (VoIP).
Anonymous joins	✓	Enable meeting attendees to join on their computer, even if they aren't signed into an account.
Application sharing	✓	Share individual applications / programs vs. entire desktop.
Audio dial in	✓	Call 10-digit dial-in number for devices to use the PSTN for audio meeting access.
Blurred backgrounds	✓	Obscure the view behind your video.
Call me / dial out options		Allow dial-out to the PSTN to join the desired meeting session.
Co-hosts	✓	Add co-hosts to meetings for shared moderator/host responsibility.
Dark mode	✓	Offer dark mode as a theme for client or web settings.
Dynamic bandwidth adjustments	✓	Enable a stable, consistent connection while prioritizing audio and screen sharing over video.
Echo cancellation	✓	Fix the issue of hearing your own voice echo back in the call.
Encryption	✓	Secure messages, voice, video and content with AES 256-bit encryption.
Mobile applications (iOS and Android)	✓	Download the app in the respective app store for Apple or Android.
Multiple themes	✓	Select and apply alternate interface themes.
Noise suppression and cancellation	✓	Filter out background noise to help limit call distractions.
Personalized meeting links	✓	Design and use personalized meeting URLs for online meetings.
Record your meetings	✓	Record meetings to share with colleagues and replay as needed.
Scheduling a meeting	✓	Specify a date and time to schedule a meeting.
Screen share	✓	Share entire desktop or application during an in-session meeting.
Share application with audio	✓	Share an individual program with audio content that will be heard in the online meeting.
Single sign on (SSO)	✓	Log in using your company credentials (through supported integrations).
Stereo audio	✓	Support a stereo listening or broadcasting experience vs. mono only.
Switch between devices	✓	Switch active calls between mobile and desktop devices without interruption.
Video conferencing	✓	Use high-quality, wide-band audio and high-definition video conferencing.
Video tiles	✓	Enable video with one click to interact with your meeting attendees visually; highlight the video of speakers.

Collaboration Features	HD Meeting	Definition
Virtual backgrounds	✓	Display a specific image as your background during a meeting.
Visual roster / attendee list	✓	See who joined/declined the meeting, who is running late, who is currently speaking and the source for background noise (to mute that specific line).
Live closed captioning		Get live captions of spoken audio during the virtual meeting.
Live translations		Automatically translate audio to your preferred language.
SMS invites and sharing		Invite attendees to live meetings or share recordings via text messages.
Mobile recording		Start, manage, and share recordings from a mobile device, including viewing archives and playback.
1:1 Chat	✓	Chat with colleagues directly, in a group or chat room.
Adjustable video resolution	✓	Change the desired video resolution for devices or bandwidth requirements
Annotation tools	✓	Allow the presenter to notate and call out information on the shared screen with arrows, spotlight, highlights and vanishing pen.
Breakout rooms	✓	Use breakout rooms during video calls to divide participants into smaller groups.
Chat rooms	✓	Collaborate on projects, share files with colleagues and use @mentions to direct messages to specific participants.
Conference room systems	✓	Support most Session Initiation Protocol (SIP) and H.323 video conferencing systems; simply join by entering the meeting ID into the device console.
Dual monitor support	✓	Deliver the video layout and screen share content on two separate monitors/screens.
Hand raise	✓	Give participants the ability to let moderators know they want to speak.
Live streaming	✓	Watch the meeting via a 3rd party application.
Multiple tiers	✓	Meet user needs with volume or feature licensing options.
Polls	✓	Create polls for participants to vote on during video calls.
Presentation slide control	✓	Control navigation of slides without interrupting the presenter.
Q&A	✓	Allow participants to ask moderators questions during the video call.
Remote control of computer	✓	Gain access to the computer and user remote keyboard.
Reporting / attendance tracking	✓	Learn which meetings occurred, the meeting duration and the attendee list for each meeting via the WE Connect portal or admin console.
User management	✓	Assign the right level of permissions to your users, add or suspend users, and reset meeting IDs.
User presence	✓	Check the availability of other users in the same account/tenant.
Video as virtual background	✓	Display a video as your background during a meeting.
Waiting room video options	✓	Play commercials or various forms of media for participants in the waiting room.
Webinars	✓	Leverage webinars for large audiences or events that are open to the public.
