

# Upgrade your SD-WAN with security

Add security to your VMware VeloCloud™ SD-WAN with SSE, powered by Cato Networks

## Special offer

Layer industry-leading cloud-based Security Service Edge (SSE) over the top of your existing SD-WAN without disrupting your current network to enhance your security posture. Plus, you can manage it all via an easy-to-use management portal.

### **SSE: Instant security. Seamless network integration.**

Cloud-native SSE enables you to instantly integrate next-generation security components into existing network environments.

#### **SSE includes:**

#### **Firewall as a Service (FWaaS)**

Secure all traffic and eliminate on-premises appliances.

#### **Secure Web Gateway (SWG)**

Safeguard users from malicious traffic and website threats

#### **Zero Trust Network Access (ZTNA)**

Minimize risk from remote users and dynamically enforce security policies. Replaces legacy VPNs

### **Optional Security features:**

Threat Prevention (Intrusion Prevention System, Next-Gen Anti-Malware & DNS)

Endpoint Protection Platform (EPP)

Cloud Access Security Broker (CASB)

Data Loss Prevention (DLP)

Managed Extended Detection & Response (MXDR)

Security as a Service API (SaaS API)

### **Starting at \$71 per month for 35 Gbps\***

1 month free service / 12-month contract or;

2 months free service / 24-month contract or;

3 months free service / 36-month contract or;

4 months free service / 48-month contract or;

5 months free service / 60-month contract
